Some are More Equal than Others

SOME LESSONS LEARNED:

Electronic entertainment is a monster business. It took two wings of the Los Angeles Convention Center to hold a major electronic entertainment showcase, plus an extra room for late entries and, finally a little cordoned off area for the adult software. Displays by Acclaim, Sony and Phillips were phenomenal, easily millions of dollars invested just in the set-ups. The two major rooms were dominated by the giants of the industry. Sega and Nintendo flexed their muscles in a big way. Yet, even the less monstrous companies tried to keep up. Sirius entertainment, who make those \$30, five foot long strips of CD-Roms, threw a serious party the first night of the show, featuring the

Ramones and the Artist-Formerly-Known-As-Prince. Folks that hung out for the Ramones were merely tired the next morning. Those that stayed for Prince didn't get back to their hotels until 5:30 AM, and were seen with IV drips of coffee.

As with so many computer and electronics trade shows, adult software proved to be the Rodney Dangerfield of the electronic entertainment industry. As the sign which adorns this column indicates, there's the "Adult Entertainment Section," and there's "all others." The adult entertainment people could have felt a bit arrogant about that if that sign hadn't relegated them to a far corner of the Convention Center. It felt a bit like a ghetto, though by the end of the show it also had the ambiance of a private club. Despite being shoved off into the corner, curiosity or prurience overcame nearly everyone who attended the show. Most wandered through, if just to gawk at John Wayne Bobbitt and the young ladies that MacDaddy Entertainment brought over.

As George Orwell so aptly put it, all pigs are

created equal, but some pigs are more equal than other pigs. Although the bulk of their product was adult oriented, companies managed to land in the mainstream, well travelled sections of the show. Our cover subjects, Pixis Interactive were on the main floor, at the perimeters of Segaland. Electromedia also occupied a corner of the self same Sega-dominated arena, demonstrating *Virtual Vegas* and *Go Digital*. Penthouse, under their corporate General Media guise, were displaying their *Virtual Photo Shoot* CDs not far from the Nintendo big-top. Vivid Interactive also took a corporate dodge to Nintendoville, displaying their erotic titles alongside their new age titles. Digital Playground took two booths, one in the adult section to display wares like *Vampire's Kiss* and *The Maddams Family*, and the other to display the trailers for their forthcoming Dream Theater line of non-x-rated material, like *The Adventures of James Spawn* and one involving a cybernetic dog that they had on display. It was pretty amusing watching the Pixis and General Media people, as all their material was

"adult" and they had to play their discs discreetly so as not to offend the folks checking out the 64 bit gaming platforms all around them.

On a more personal note, I learned not to trust valet parking, not even at one of the major hotels. In a fit of exhaustion induced stupidity, I left my briefcase in my car when I parked it in a valet lot while at a breakfast meeting. The thief(ves) showed uncommon discretion. They left my bag intact, taking valuables like my tape deck, camera and film. I didn't even notice they were gone until I got to the Convention Center. To further demonstrate the miscreants' good taste, they stole a half dozen copies of our first issue.

Letters

TERI OR TERI-BLE?

One would think that, in a market where there are very few disks that are really interactive, and in a magazine that supposedly specializes in "interactive" media, the reviewers would have been told to look for interactivity and advanced technology, and to suppress their urge to pander to the largest advertisers.

Thus it distressed me immensely to see an entire page devoted to see an entire page devoted to MacDaddy Entertainment and *Heidi's Girls*, one of the worlds' true non-interactive shovel-ware products and a positive review given to *Dream Machine*, which is mastered in 30 minutes and has eight total film clips with no interactivity at all!

On the other hand, your reviewer gave *Girlfriend Teri* low marks. Here is the ONE game in the world where you actually DO interact with the girl, where you talk to her in plain English and she talks back, where your playtime is measured in months and not minutes, where the development

money is spent on artificial intelligence technology to replicate the personality of a human female and not on expensive advertising campaigns for shovel-ware.

I think this reviewer was looking for an arcade game and not an interactive, virtual romance that gives the player a nice, lengthy playtime of sensuality.

DAVE MORRIS
AIVR CORP,
TEXAS

While much of what Mr. Morris has to say in defense of his product is every bit as valid as the criticism our Ed Tsunoda leveled at it, he was way off base on a few things. Our goal is to inform, covering the content, playability, and level of interactivity so that the reader can make an educated decision about adding a title to their personal collection. We use a great many respected critics with varying points of view. Starting with this issue, we will be running pro/con opinions of some titles. The piece on MacDaddy was a feature, not a critique, though Ed did

like Tabloid Beauties. The closest we've come to having a company executive review their own product is this letter. I have to wonder though, having been sent a letter from the company with guidelines for reviewing their product as to the nature of the other reviews Teri has received, case in point the following letter ...HB

I must say I was impressed with the skill, quality and boldness that were contained between your covers. I laughed with a roar when I read Ed Tsunoda's review of *Girlfriend Teri* — he was more than kind in reviewing that piece of trash.

KEN
OHIO

JUST WHAT THE VAMPIRE ORDERED

This is the kind of info I have been looking for. Just bought my first XXX CD (*Vampire's Kiss*) and while I was not disappointed, it was not nearly as interactive as I had imagined.

Just want to say thanks for coming out with the IQ and good luck. I hope you are successful.

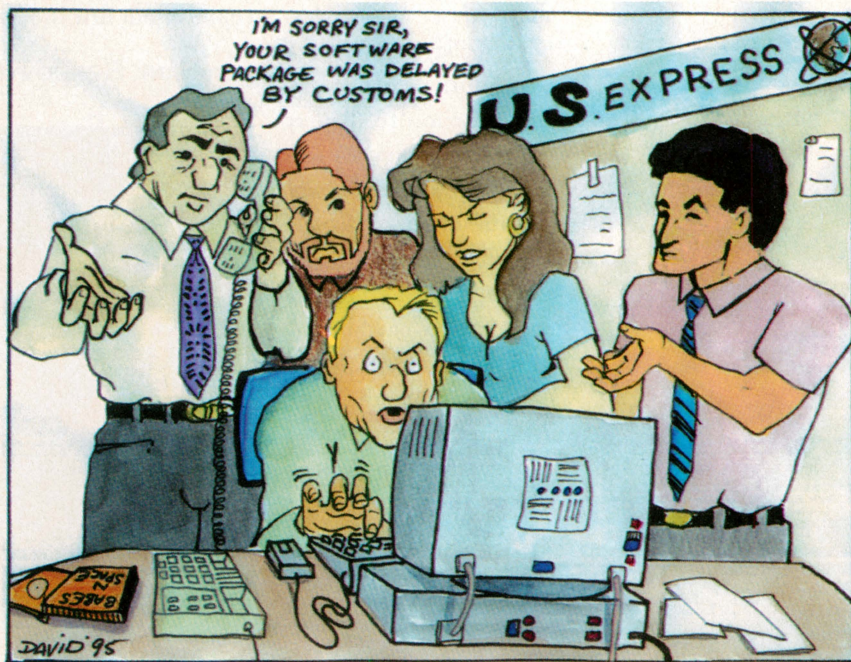

BRAD
MICHIGAN

THE NAKED AND THE ROM

WOW! I just received my sample premiere issue, and the best I can say is it is about time!!! I am tired of all the conservative efforts out there to censor the "other" magazines.

At roughly \$2.50 an issue, heck I can't even get an adult magazine for that kind of price. And *Hustler* wants \$90.00 a year just to join their WWW page. For \$90 I better be getting something illegal in 48 states...

The price is great, and IQ is even better. I will be looking forward to

Letters

each and every issue. One tip, if possible please try to post lists of the following: (maybe even review a few) :

"Good" WWW sites, FTP areas, and Newsgroups

and: E-mail address or even phone/fax numbers of organizations / people in the powers that be, that are trying to prevent great magazines like yours from being distributed to anyone who requests them. Also the addresses of people trying to keep the information highway FREE of government control.

Thank you for a wonderful magazine and keep up the great work...

**FRANK
NY**

Frank, check out our On-Ramp column. I think you'll be pleasantly surprised, as we cover some of the FTP areas on the 'net. Keep watching that space for WWW sites and other on-line goodies. As for the censors, it never hurts to let your congressperson know that some people still believe in the first amendment. — HB

I just finished reading a good portion of *IQ* magazine. My first response is... it's about time a quality magazine covered adult CD-Roms. Even though I know I'm not, people hear the word "adult" or "X-Rated" and think, geez, this guys' a weirdo. Again, I'm not a weirdo. I have never had an adult magazine (*Playboy*, *Penthouse* etc.) in my house, nor have I ever had an X-rated movie. You see, I have children, curious children who know how to use VCR's. However, I do enjoy adult material and CD-Roms are an excellent way to have some adult material at home because you can very easily keep a program away from kids and at the same time continue to allow them to use the computer,

kind of the ultimate hiding place!

At any rate, I just wanted to say thanks for the free issue and I will soon be ordering my subscription. I also have a few idea's for your upcoming issues.

1. Reviews are too short, make them more complete by letting the reader know if there is any violence (and how much violence) in an adult program (I simply don't want a program that mixes violence with sex). Also inform us on the type of sex acts that are portrayed in the CD-Rom, lesbians (I hope), threesomes, masturbation, toys, S&M etc. Finally be brutally honest on your ratings and let us know the difference between "R", "Hard R", "X", "XXX" and so on.

2. More screen shots from the programs. Lets face it, the woman in the ad for a program doesn't always look as good once she's on your hard drive. Also, let us know the screen layout, a few good pictures, I don't mean hard core stuff, just screen shots that give us a feel of the action. (I don't want you to get any more graphic than *Cosmopolitan* if you don't want to).

That's all for now, again thanks and I'm looking forward to your next issue.

JATTACK

OOPS

Great magazine! And long past due, there's a real need for it. Unfortunately, I won't be able to subscribe because it appears that you just aren't discrete! Due to a desire not to go to divorce court, I receive such shipments at work. And due to a desire not to be fired, I don't think that I can receive your magazine.

If your mailing policy changes, let me know. Otherwise, I hope that your magazine makes it into the local

Hastings book shops so that I can continue to receive it and read your reviews.

RICK

Starting with this issue, as you might have noticed, we're shipping a little more discretely. — HB

THE LAST TEMPTATION

Today I received your sample copy of *Interactive Quarterly*, along with your letter introducing it and your subscription offer. Your letter ended, "either way, we'd love to know what you think of our magazine, so drop us a line."

You asked for it.

I should have thrown your magazine in the trash, unopened. That indeed would have been the Christian thing to do. I did not. I looked at it, and yes, I confess I saw things in your advertisements that I would have liked to have. Then I thought of where pornography had taken me in the past and the morass I'd let the dirty books and movies drag me into. Your magazine made a nice, solid *THUNK* when it hit the bottom of the trash can.

I think the magazine is an instrument of evil. I think it is a trap set to snare those who are susceptible, including myself.

Please remove me from your mailing list.

**KEVIN
GEORGIA**

We welcome letters from all our readers. You can send them via E-Mail to IQMag@AOL.com, or you can post them to *Interactive Quarterly Letters*, 552 Valley Road, Suite #373, Montclair, NJ 07043. All letters become the property of *Interactive Quarterly*, and we reserve the right to edit for length and content.

COMING IN FROM LOS ANGELES, BRINGING IN A COUPLE OF KI(LOBYTE)S...

In early Summer, the publishers of *IQ* and I took a few copies of the first issue—still wet from the printers—and went out to LA for the first Electronic Entertainment Expo (E³). The conference promoters called it the last word in electronic entertainment. They

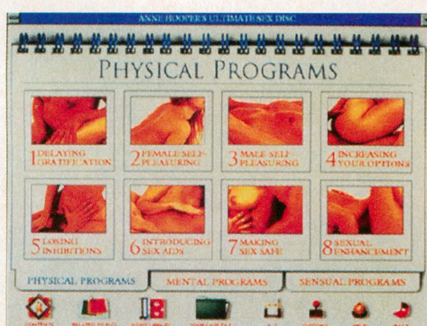

undersold it. The event combined the best elements of a consumer electronics show and a multimedia circus (for more, see the editorial on page 6).

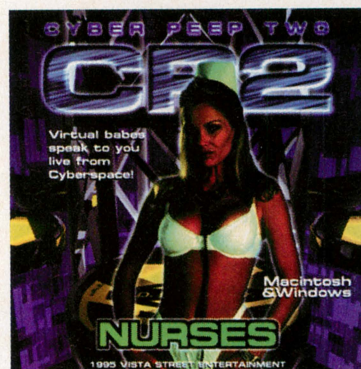

The old axiom that sex sells was apparent throughout the Expo, though sometimes you had to look hard to find the examples. Even the most mainstream of companies realize this, however:

Phillips will be coming out with an interactive volume based on the old standby and guide book, *The Joy Of Sex* by Alex Comfort. The package includes a hard-bound copy of the book and a game to test a couple's sexual compatibility.

Similarly, Dorling Kindersley will be releasing *The Ultimate Sex Disk*. Based on the work of noted sex therapist Anne Hooper, the CD-Rom explains it all in vivid detail, as well as putting together a sexual profile for you and your lover, sharing case files, offering methods for better sex, and presenting a Sexopedia, with information on everything from ancient lovemak-

ing techniques to modern sex aids. Even among the educational software set, sex is a powerful motivator.

LOST IN SPACE, PART 1

The success of *Space Sirens* has not been lost on the competition. For example, Vista Street's new series, *CP2-Cyber Peep 2, "The Next Generation"* sets the player loose in a space station holodeck to find clues that open the doors to the girls. The discs come in four flavors — Waitresses, Cheerleaders, School Girls and Nurses. What inquiring minds want to know is, what are cheerleaders doing on the holodeck, Number One?

LOST IN SPACE, PART 2

On the subject of *Space Sirens*, Pixis claims that, beyond the hype of new and advanced

game play, their "new sirens play for keeps and if they are disappointed, they let you know in a most devastating way." Wonder what that means? Beat me, flog me, fry my CPU?

Directed By Sir Anton Swill

dirty debutantes

2

ASIAN INVASION

**INTERACTIVE
ADULT CD-ROM
FOR MAC AND WINDOWS**

The long awaited follow up to Dirty Debutantes Interactive Volume 1 is here! Valiant Captain Ed Powers is getting it from all sides by luscious Asian beauties, but like a true soldier, he is coming out firing...
with his pants down!

Help Ed as his sojourn leads him deep in into jungles of uncharted territory. Interactivity, hard core action, and Asian knockouts make this CD-ROM a collector's choice.

international censors

Japan has a law against showing certain aspects of sex that porn aficionados in America take for granted. Japanese porn uses the blurry dot video techniques that the tabloid news shows on TV employ when they don't want to show a source's face. Only the Japanese use it on other parts of the body.

On the other hand, Japanese porn tends to be considerably more aggressive when it comes to violence. Rape, S&M and the portrayal of underage characters (rightly banned in the US) commonly show up in Japanese erotica. Recently, there's been a crackdown on imported porn according to the Los Angeles-based magazine *The Bridge*. Seems east is east, and west is west, and the sexual mores, especially when it comes to erotica, shall not meet.

VENUS IN THE JEWEL BOX

What has three *Penthouse Pets*, two Miss Nude Worlds, and the most photographed nude model in the world? If you said the third day of Sexmas, you wouldn't be too far off. It's *Venus' Playhouse*, a new release from Adult Interactive. Starring Venus De Light, six time winner of the Miss Nude Universe Contest, this steamy bit of interactive erotica features ten women having fun with everything from the garden hose to whipped cream in Venus' six room virtual fun house. For those who can't get enough, there's an hour-plus video on the making of the disk.

THE BIG SCREEN

WHILE DISCONTINUING THEIR POPULAR *SUPERSTARS OF JAPANESE PORN* TITLE, A6 WILL PUT OUT *SUPERSTARS OF JAPANESE PORN 2*. IMPROVEMENTS INCLUDE AN OPTION THAT WILL EXPAND THE VIDEO TO FULL SCREEN WITHOUT REQUIRING MPEG HARDWARE. SEVERAL OTHER COMPANIES, INCLUDING ARCUS, ARE WORKING ON THE SAME KIND OF SOFTWARE. THE CYBERVERSE HAS JUST BECOME AN EASIER PLACE TO SEE.

ANNOUNCING THE AMEE AWARDS

Mark your calendars, adult entertainment fans. One of the highlights of this November's AdultDex adult entertainment and technology exhibition (Sahara Hotel, Las Vegas, November 13-17), same date and city as ComDex, will be the presentation of the First Annual AMEE Awards. The AMEE (for Adult Multimedia Excellence in Entertainment) will recognize superiority in the field of adult multimedia entertainment. These awards, presented by *Interactive Quarterly*, mark the first award show to salute achievements in this field.

Winners will be chosen in the following categories:

- Best Interactive Adult Game
- Best Movie Disk
- Best Picture Disk
- Rookie of the Year (Best Premier CD-Rom)
- Best Original Musical Score
- Best Actress
- Best Actor
- Funniest Adult CD-Rom
- Best Casino Game
- Best Graphics/Animation
- Best Package Design
- Technical Achievement Award

We welcome reader's suggestions on what our award statuettes should look like, and will come up with a suitable prize if we use a reader's idea. Contact us at: IQmag@aol.com (under subject, put AMEE Statuette) or write to AMEE Awards, *Interactive Quarterly*, 551 Valley Road, Ste. 373, Montclair, NJ 07043

You may also enter by sending in a postcard the words "Interactive Quarterly" along with your name, age, date of birth, and address, and mail to: IQ Contest IQ0995, 551 Valley Road, Montclair, NJ 07043, postmarked by December 15, 1995. • Only one entry per household. No mechanical reproductions. • You must be 21 years of age or older to enter this contest. • Winners will be selected in random drawings and notified by mail. A list of the prize winners may be obtained by sending a self-addressed, stamped envelope to the above address. • Odds of winning depend on the number of entries received. • Void where prohibited by law.

INTERACTIVE QUARTERLY
AMERICA'S PREMIERE ADULT CD-ROM MAGAZINE

Inside the mind
of Pixis Interactive's Mark Media

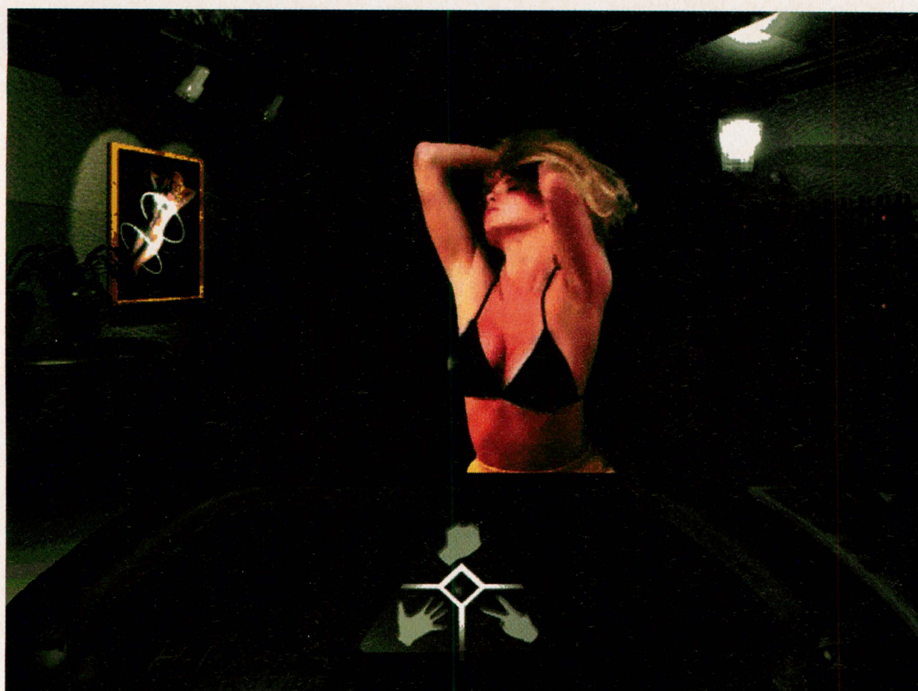

MEDIA

COOL

BY
KURT
LARKIN

rEMEMBER WHEN WOODY ALLEN'S CHARACTER IN *SLEEPER* EMERGED KNOCK-KNEED FROM THE ORGASMATRON? Technology isn't quite there yet, but Pixis Interactive is leading the march in that direction. This small Orange County, California firm cranks out adult software that comes as close to

"WE HAVE VERY INDIVIDUAL ACTUALLY

we're seated at an outdoor table. "That was the past. This is now." Which is precisely the credo by which Media and co-founder Paul Wu run Pixis.

"I don't look back," says Media (pronounced med-dia, so it wasn't all that prophetic). "If I try to look back, then I'm taking my eyes off the future. We're pretty much the visionaries in the adult market right now."

Media lowers his voice at the word "adult," as if his livelihood embarrasses him. "A lot of people want me to be the Hugh Hefner of the 21st Century. They build this fantasy of women all around me, but it's nothing I really aspire to," he says. "I come from an ultra-conservative background. The whole adult industry is a very chaotic business. I feel I need to maintain a sense of stability in my own life for counterbalance."

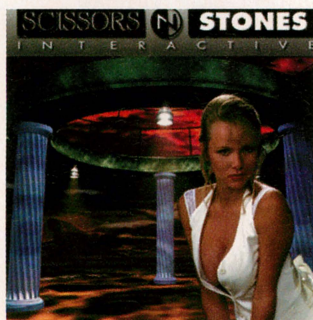

Media, a self-described spiritualist, is big on dualities. The success of Pixis, he

Woody's mechanized chamber of lust as current technology allows. Pixis titles enable your mouse to slide either a hand or penis onto selected areas of a virtual woman. Users then watch live-action video of their chosen implements do their uninhibited duty. It's called TFUI (Touch-Feel User Interface, pronounced tuhffoo-ee), and it's the main reason Pixis Roms such as *Virtual Vixens*, *Space Sirens* and *Neurodancer* consistently dominate the market.

Making a date to dine with the co-president of Pixis at West Hollywood's chi-chi Chin Chin's, I half-expected Al Goldstein's twin to show. Instead, Mark Media, a reserved Asian businessman wearing a polite smile and a perfectly tailored gray suit introduced himself. These preconceptions caused a half hour lapse while we tried to find each other.

"That's okay," Media murmurs as

PIXIS INTERACTIVE TITLES: The Media Takes

1993

SCISSORS & STONES

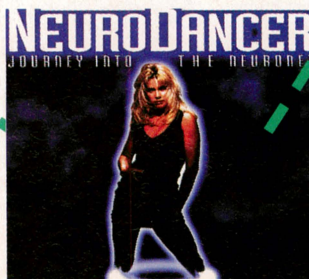

"Our first attempt to enter the interactive market. It established our name in the marketplace and continues to sell to this day. It was groundbreaking because it utilized a full-screen atmosphere plus the interface design was simple. It's also the game we left bloopers sequences in. Overall the women had lots of fun doing it, because they're put into situations with a lot of humor."

BABY
PIXIS

1994

NEURODANCER

"The first game to ever use TFUI technology. Since it involved dancing, it allowed us to pay a lot of attention to the music. We were fortunate enough to have on board some of the most talented musicians out there to write a very haunting soundtrack of ambient music. We feel that with any new medium, the media that go into it should be somewhat new. Ambient is cutting-edge music. The bands I'm into are Aphex Twin, Future Sounds of London, The Orb..."

1994

VIRTUAL VIXENS

"Very arduous. It took our TFUI one step further because it was a little more explicit than Neurodancer, which was an R-rated title."

SICK MINDS AT OUR OFFICE. IT'S RUMORED THAT ONE
BROKE THE BANK IN MENTAL HEALTH COVERAGE."

says, rests squarely on the synergy between himself and Paul Wu.

"I'm the chaos and he's the control element," Media says. "You can call me a surrealist, while Paul is a realist. I'm pretty much into the high-impact, alternative, eclectic mediums, which is why our titles have a lot of graphics and cutting-edge special effects and music. Paul is the down and dirty technology person. He's the technologist. He pretty much keeps my vision in line."

The fact that neither Media nor Wu has previous credentials in adult video has proven a boon in the corporate world. Media brought a background in telecommunications, computer hacking and an interest in video as a hobby. Wu specialized in computer hardware design and manufacturing. The former college buddies formed Pixis in February 1992. They reasoned that the coming of video playback for computer in such forms as

Quicktime presented an opportunity to do for CD-Roms what adult movies did for video rentals.

"By being a technology group we're able to inject a lot of new thoughts into an old market," says Media. "Most of our competitors are guilty of recycling video from their vaults. We shoot original footage for each CD-Rom. We spend the extra time needed for 3D animation sequences and other elements such as costuming that add to the overall atmosphere."

That atmosphere takes as many cues from the Sci-Fi Network as it does from the Spice Channel. In *Space Sirens*, for example, you're a pilot stranded on an space station. Maneuvering through a mysterious maze you uncover four hot women who, if you don't service them correctly, will enslave you forever.

Beyond science fiction and, of course,

erotica, all kinds of cultural input provide inspiration for Media and Wu's vision. The principles' interests, from horror movies to graphic novels and even Eastern philosophy, further elevate Pixis from the pack.

"Zen is inherent in our interfaces," Media explains. "We try to keep them as simple as possible. We feel that minimalism is best for conveying ideas and messages." TFUI consoles feature a hand tool, penis tool and pleasure meters that let you know how both you and your subject are feeling. (Would that real women had one!)

"We try to engage the user," Media says, "adding some creativity to the experience." For instance, no Pixis babe will allow you to wield your penis without readying her with your hand first. Rush the action and you're liable to get a stern lecture.

"We do want to satisfy the sexual

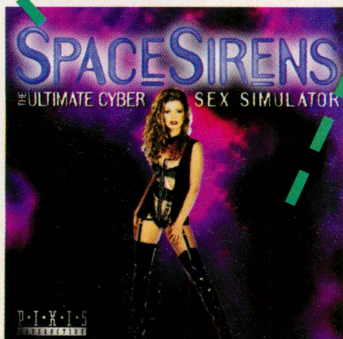

1994 SPACE SIRENS

"The pinnacle of our success. It's one of the best-selling CD-ROMs out there. It pre-sold 45,000 copies and continues to sell very strongly. It's somewhat H.R. Giger-esque, *Aliens*, it resembles that. Also *Space Sirens* was influenced by *Barbarella*—it's like an interactive version. We're all science fiction fanatics."

1995 SPACE SIRENS 2: MEGABABES FROM AJIA

"Right now this is my favorite. It's based on these adorable women wielding big guns. There's some type of irony or duality to that—justice and also empowerment. If you don't satisfy them they literally blow you away with a plasma gun."

LATE 1995 DIVA X

"I can't really tell you about that one yet."

? 1996

MAX THE NAUGHTY DOG

"Technology and humor combined into a 3D-generated canine. In the future this Japanese corporation manufactures this dog for military purposes and you have a choice either to use it for the benefit of mankind or selfishly for yourself. It has a built-in video transmitter and surveillance system. You win the game by eliminating the criminals trying to invade specific areas of a house, because you are a watchdog. But you can watch other things happening, too."

FUTURE

curiosity of our users," Media says, "but at the same time we want a very healthy approach to human sexual interaction. It's a simplistic approach, but it's a step toward educating men that you just don't go and dive into the action. Most men don't realize that there are certain things you have to do to please a

woman first."

This partly illustrates the amount of creative thought that goes into a Pixis program. The Pixis creative process begins with someone in the company bringing up an intriguing idea. A round-table pitch meeting ensues, where the idea gets fleshed

out. These uninhibited creativity sessions then get focused into a cogent idea for some software.

There will be a rough outline of what it entails," Media says. "Then the production team adds their ideas and input, and we do the story-boards. At that point we edit and re-edit the script and find out what tools or technologies need to be used. Finally, we go to a sound-stage and videotape against a bluescreen."

The actresses, strippers and models—many of whom have never had to memorize a line before—film a myriad of different options for the game. The process, from conception to fruition, may take anywhere from six months to a year. The staff often toils overnight.

"We have very sick minds at our office," Media offers. "In fact our company offers full medical, dental and mental benefits—one of the few compa-

Let's face it. Sex is pretty funny stuff. There wouldn't be so many dirty jokes if it weren't. *Virtually Yours 2*, while it doesn't skimp on the carnal knowledge, capitalizes on that humor quite deftly in several regards.

First, some of the movie clips are downright laughable and campy. Six long pieces can be found in the program's main room, called the Holodrome. Your hostess Monique introduces each one in breathy tones. One is a threesome involving a supposed woman from outer space, whose pedigree is confirmed by the pair of deely-bopper antennae she wears. Another features the venerable porn actress Seka taking on three "heads of state." A third shows the initiation of a woman into the Mile High Club in a airplane rest room, and a fourth depicts the deep meaningful relationship possible between a man, a woman and a bowl of raspberry jelly.

Other rooms in the game have similar light-hearted touches. One is heaven on earth for the breast fancier — the walls of the room are lined with them. Another takes the player literally back to the womb. In the Cyber Cafe, the pictures on the wall morph into other faces. And then there's the Hacker's Sanctuary...

Which leads us back to the pneumatic Monique. At the end of *Virtually Yours 1*, she had been undressed to her bra and panties. After viewing the first two films in the Holodrome, those items of apparel go the way of the dinosaur, and after each succeeding film she offers to masturbate using a vibrator, a dildo or her hand. Finally, she confides that her fantasy is to emerge from the computer and ravish the person on the other side of the screen. Down, boy! To accomplish that goal, you need the Hacker's help, and a special password...plus a certain amount of imagination.

While some of the film clips are mediocre, most are

places you don't need any.

Virtually Yours 2 provides ample value for the money, both in terms of quantity (there are an awful lot of film clips) and quality (the inter-

the joke of SEX

pretty hot stuff, with attractive women and studly men (of the likes of Alicia Monet, Ginger Lynn, Purple Passion, Erica Boyer and Ron Jeremy) doing various lewd and lascivious things to one another, sometimes in groupings of three or more. The platform may not push the envelope of computer design, but it's serviceable enough and easy to navigate. You really don't get much in the way of instructions, but in most

face is smooth, the resolution high and the action varied and hot). Finally, it's much more interactive than most examples of the genre, which isn't saying much, but at least it means one can play it more than once without feeling that overwhelming feeling of *deja vu*.

men in **MOTION**

Offers tips
on seducing
and making
love to a man,
complete
with chart.

Men in Motion is a trim little package. Put out by Rom-Antics, the animation is clean, the graphics are clear, and Pat is pretty darn cute. From the moment the title sequence initializes, it is clear that this *Men in Motion* was lovingly crafted with an eye towards quality and aesthetics. The interface is simple and fast moving. A heartbeat after I start to play, I am cooling my cyberheels in the club's lobby.

The premise for the game is that you are going to an exclusive New York club with the hottest male dancers on the strip (kind of like Times Square without that pesky Disney theater messing with the ambiance). You have two hundred dollars (unless you find more in the club) and that money has to last you. (Pat won't strip unless you pay him).

Try not to blow it all at the newsstand, although some of the products Habib is hawking

are worth it.

As the title suggests, this CD-Rom is aiming for those of y'all who like to look at naked men. (I happen not to mind the sight). Don't get too excited. All you get to do is look at the nice boys and listen to them talk about sex. They never pair off with anyone or anything. And while they always seem excited and happy to be there, they never get so gleeful that they just bubble over.

The whole game is full of fun and foolishness. You do not "launch" *Men In Motion*, you "raunch" it. When you exit the game, you are not presented with other Rom-Antic titles currently on sale, you are thanked for COMING. The lobby of the club is no exception. Click on the pictures in the hallway and you get to see the most unusual way of pouring wine that I've ever witnessed. Click on the statue and it springs to life! Click on the magazines and read all about drag queens and... well, you get the idea.

Although I get the distinct impression that Pat (so cool that he smokes and wears shades on the runway) would rather be hanging with Casper (the heartland's contribution to the dance lineup)

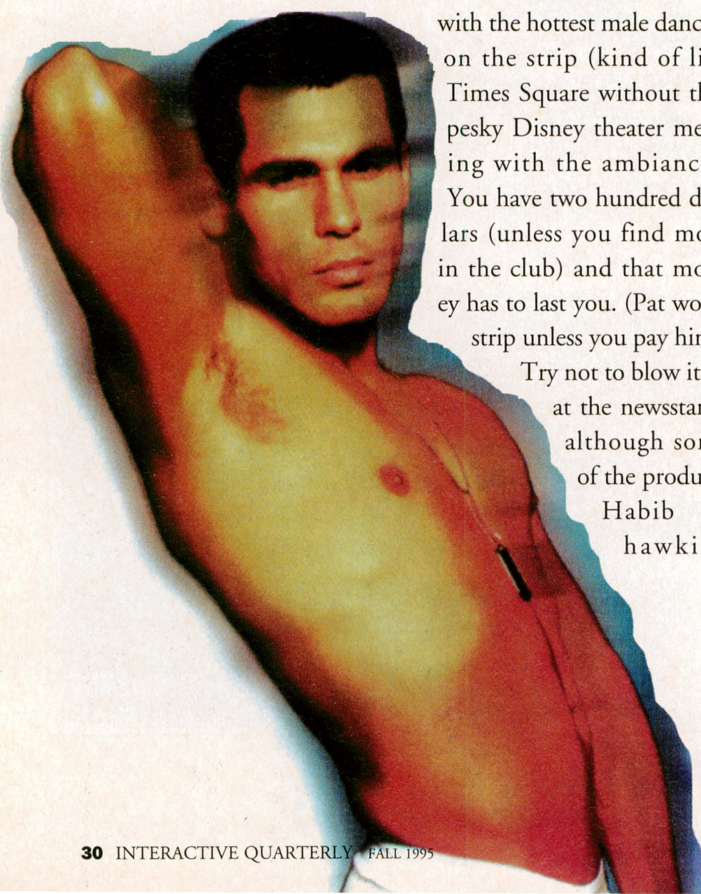

or Lee (who has an obvious love of leather and body piercing) than with me, the homoerotic undertones are actually subtle. In their portfolio profiles, each dancer speaks of their turn-ons, turn-offs and favorite fantasies, all the time being careful to the couch their tales in neuterneutral terms. Still... they're enchante tonight, they're much too gay tonight, they are not thinking of me...

But the whole game is discreet. When I play other CD-Roms in my Windows environment, too often their installation leave a hallmark window. "Um, how come you have a WAY HOT BABES window, Ruth?" This CD-Rom is a little more thoughtful.

What I enjoyed more than anything else (even Pat) in this game was its educational aspect. Oh, yes, this game boasts a HOW TO section. Within the game, available for twenty virtual dollars at the newsstand, is a tome with tips on seducing and making love to a man, complete with legend and chart!

Virtual V

The animated quest

Valerie of Cyberotica returns

Are you ready for a new sexual dysfunction? Well, to hear Mike Saenz tell it, Virtual Performance Anxiety may be in your future, especially if that future includes the recently released *Virtual Valerie 2*.

Virtual Valerie, the once and future animated star of interactive adult entertainment, is back in torrid action, the long-awaited sequel to the 1990 best-selling CD-ROM game which is credited with creating the interactive adult CD-ROM market.

The anxiety comes in, Valerie's creator Michael Saenz suggests, because Valerie grades the user's virtual sexual prowess. "People will be absolutely amazed at the exciting advances in interactivity and graphics in this new game," says Carl A. Bruno President and CEO of South Pointe Enterprises, parent company of Arcus Media Group, a wholly owned subsidiary that develops and markets digital entertainment products such as interactive videos and multimedia games (including our gal Val) and its Metro Home Video sibling company which is charged with distributing *Valerie*.

"*Virtual Valerie* is the icon of adult interactive entertainment," Arcus

Marketing Director Maggy Dunphy explains. "Even before its official release, this new edition got tremendous publicity and hype in the press and on television."

Indeed, over 5000 orders were placed for *Virtual Valerie-2* as soon as Saenz mentioned that it was forthcoming in his America Online forum (ReactorInc@AOL.Com). Bruno says that Arcus did a first production run of more than 30,000 copies prior to release and has already made arrangements to go back into production for a second run because they fully expect a

sellout.

"When you consider that the original *Virtual Valerie* was a smash success and it was only accessible to those who had a Macintosh computer, and that this one is available for the PC as well," he notes, "you can't help but recognize that this is a big event in the industry."

Software entertainment developer Saenz is a recognized innovator, and something of a character. He reminds one casual acquaintance of a cross between the Joker and the Riddler, but always dressed in black, with shades whenever possible. A former illustrator for Marvel Comics, like so many other Marvel creators, he left to do something a little more grown up. His software credits include *Shatter*, the world's first computer-generated comic book. He also created *Spaceship Warlock*, another sophisticated interactive CD-Rom offering, and *Donna*

BY JAY JACEY AND HANK BORDOWITZ

Matrix, an interactive action sister to Valerie, put out by his company, Reactor, Inc., of Chicago.

Saenz describes *Valerie*, his adult creation, as "sassy, smart and kinky. She's not a real woman, but her programming makes her vastly more engaging than video vixens and pin-up queens.

**"I'd classify her as a bitchin' Barbie."
—Dunphy**

video vixens and pin-up queens. Besides," he quips, "she warms up a lot faster than any spread sheet application that I know of."

In addition to putting out this new incarnation of *Valerie*, Saenz has made a

"Director's Cut" upgrade of the original *Virtual Valerie*. With the new software, Valerie speaks with a digitized human voice. Additionally, CD-Rom's fastest woman will perform even faster. Saenz and his buds at Reactor also improved

the graphics and animation, enhanced the erotic scenes with more interaction, and added continuous audio/music, as well as eliminating some of the other problems people may have encountered with the original *Virtual Valerie*. It's available through Reactor for ten bucks, but you have to have the original to send back to Reactor, and you have to have a Mac as the original *Valerie* was very choosy about the company she kept and only slept around in Macs.

Virtual Valerie 2 on the other hand, is a hybrid program. Part of the reason the program has yet to hit the streets (it was supposed to be out by last September) involves the process of debugging the Windows version. Not surprising, really, considering what an

From the viewpoint of the folks at South Pointe Enterprises, which is uniquely positioned as the only publicly-traded adult entertainment company in the United States (Nasdaq: STPN), the return of the "Queen of Cybersex" marks a major milepost on the company's journey into the world of high tech, multimedia erotica. "*Virtual Valerie-2*" is being distributed to software stores and other retail outlets by Metro Home Video, South Pointe's distribution arm, and the Arcus Media Group, a wholly owned subsidiary that develops and markets digital entertainment products such as interactive videos and multimedia games, as well as CD-ROM versions of popular adult films. South Pointe hopes to make the Arcus name synonymous with interactive adult videos and games in public perception and solidify its standing as a major player in the adult market.

"Arcus Media," vows Marketing Director Maggy Dunphy, "is going to be the name in high tech

SO WHO

adult entertainment in the '90s. We will not only be able to offer our customers the widest variety of adult titles in the industry, we expect to be on the cutting edge in terms of quality."

Arcus was formed in November 1994 to serve as the interactive entertainment arm of Metro Home Video. The company will offer its classic adult feature films on CD-ROM in two high quality formats, Hybrid (Mac/PC) and VideoCD (MPeg/CD-I).

The first Arcus release was a 49-minute sampler of highlights from the first 24 films scheduled to appear in digitalized form. That disk, "The Arcus 2001 CD-ROM Sampler," was named "Best of Show" at the Consumer Electronic Show in Las Vegas last November.

The first six full-length CD-ROM titles from

ambitious virtual woman Valerie is.

"Mr. Saenz has incorporated a three dimensional modeling in the game which has already won praise from designers in the high end of computer graphics imaging who previewed the program," claims Dunphy. "Those effects are carefully woven into the sexually explicit game and, along with a hot musical score, raise 'Virtual Valerie-2' to a new level and set a higher standard for interactive adult video. It is, quite simply, the most interactive and best designed adult game on the market."

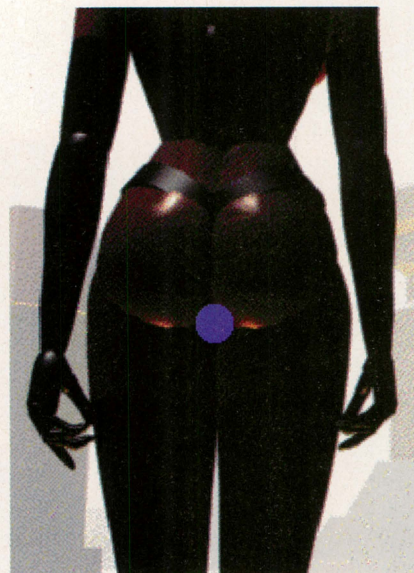

"Virtual Valerie-2" requires players to locate the cybersex vixen in one of three rooms in the No Tell Motel and then meet her demands before they are allowed to leave. The game, of course, changes each time it is played, depending upon choices made by the player. "Fast motorcycles" and "a triple-donged cybersex machine" are among the available tools. Players who get the job done are promised "a mind blowing, gene

altering conclusion, the likes of which have never, and we mean never, been seen before."

"The bottom line is, you have to please Valerie," laughs Dunphy. "She draws you into the game with her extremely seductive voice and sexy body. I'd classify her as a 'bitchin' Barbie.'"

Yet another problem Valerie has encountered in getting into the hearts, minds and CD-Rom drives of red blooded cyberotica fans everywhere involves your favorite folks and mine, the censors. A mid-May release date had to be scrapped to determine the legalities of sending the software to many of the folks who ordered it. According to a little billet-deux posted on the net, many of these orders came from "no-fly zones," areas of the country that post draconian fines of up to \$50,000 per day per infraction for "violating community standards."

When all this is ironed out, you may be person enough for Valerie, but

your computer has to be up to her standards as well. For PC playing, *Virtual Valerie-2* requires an IBM or compatible 486 or higher with at least 8 MB of RAM, Windows 3.1, Super VGA, SoundBlaster or compatible sound card and a CD-ROM drive. Mac users must have a color Macintosh II class or higher, 13" monitor, 3.5 MB of free RAM and a CD-ROM drive. 

IS ARCUS?

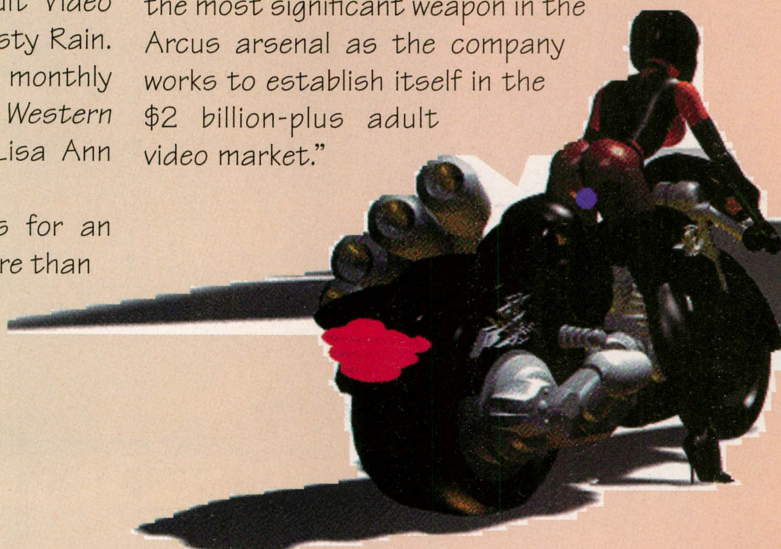

Arcus were released in late May: *Babes Illustrated #2*, starring Kaitlyn and Sylvia; *Burgundy Blues*, starring Hyapatia Lee; Chaz Vincent's *Daydreams*; Paul Thomas' *Justine: Nothing to Hide*, which won eight Adult Video News Awards, and *Taboo 12*, starring Misty Rain. Six additional titles are being released monthly throughout the summer, including *Dirty Western 2*, the number one adult hit starring Lisa Ann which was released in March.

South Pointe owns distribution rights for an adult film and video library containing more than 1700 titles, the largest of its kind in the United States, and operates a regional distributorship for adult material, including its own products.

Additionally, South Pointe recently

announced that it has acquired distribution rights for products from three other adult companies: Rumpus Films (169 titles), Silver Fox (78 titles) and Raw Talent Productions (209 titles). And the company serves as the exclusive international marketing and distribution center for Metro International Gibraltar, Ltd..

"With all that," says Dunphy, "Virtual Valerie-2 is the most significant weapon in the Arcus arsenal as the company works to establish itself in the \$2 billion-plus adult video market."

MISSION CONTROL • 800-999-7995 • 201-783-3600 • Fax 201-783-3686

The program's platform reminded me of Myst.

My father (IQ regular) Paul Grant told me he didn't care much for this program. "Short on vampires, and short on kisses," he complained. So after he went to bed, my friend and I loaded it onto my computer and had a look. Dad may have been right about the lack of a storyline, but who buys x-rated programs for their plots, anyway? First of all, the program's platform reminded me of Myst (on a much smaller scale, of course). The first-person perspective tracks around each room, putting you smack dab in the middle of things. You

feel like you're really walking through a dungeon. The little touches with the suit of armor and mirror in the first room are nice, and the short film that plays in the fountain provides some sense of plot, but not enough to really matter. Then there are the videos themselves. There are seven in all, including a short masturbation scene. They are really well done on all levels. Even when you blow the image up to full size (a nice touch you don't see in too many programs of this type) the video stays pretty high quality. More important, the

sex is pretty steamy and the good looking actors look like they're really enjoying themselves. There's a lesbian shower scene, and one with sex on a desk starring a woman with breasts that defy gravity. The cinematography is a cut above as well, especially on one scene set on a balcony lit with candles. My friend also liked the fact that when you watch the scenes in fast-play mode, not only do you get to the good parts quicker, it also sounds like chipmunks getting it on. He's a little weird that way.

—PHILIP GRANT

two sides of the VAMPIRE

VAMPIRE'S KISS
DIGITAL PLAYGROUND

If you are looking for an entertaining, fun and exciting interactive experience, *Vampire's Kiss* has sex. The players are attractive and the action is solid with all the traditional pairs — Men with women, women with women, women alone — doing all the traditional dances.

There isn't anything in *Vampire's Kiss* that resembles a plot. You do get, should you decide to click on the bubbling fountain, a collage of

clips. These provide an interesting backdrop, but *Vampire's Kiss* never answers the question of who are these people? Why are they here? Who's a vampire? Who's not? Who is the gal in the belly-dancing outfit? Where are the bats? What's it like to screw the undead? Enquiring minds want to know.

There isn't anything in *Vampire's Kiss* that resembles game play, save the guesswork in locating the clips in the

nicely rendered two room crypt. Of course, that doesn't matter to some people. Sex does, and *Vampire's Kiss* has copious copulation. But in *Vampire's Kiss*, virtual sex can be as difficult to find as real sex. Where do you go? (Down the hall). What do you click? (The mirror, the flower, the fireplace, the coffin, to name just a few).

So if you're looking for sex, yep, it's there. But do yourself a favor and just rent the

movie; a VCR with fast forward and rewind capability will provide the same experience. And maybe you'll even see some bats.

—RUTH MORRISON

Copious copulation, no plot.

IQ **REVIEW**

If still photos of topless Japanese
drink deeply.

TEXAS TABLE DANCE
LSU MULTIMEDIA

"Now you can own your own gentleman's club," says the cover copy of *Texas Table Dance*, the new CD-Rom from LSU Multimedia. While this package may not exactly simulate the experience (no sticky floors and overpriced drinks), it's a moderately enjoyable experience and probably costs a lot less money than a night on the town.

Upon entering the "club," the user is asked to choose which lovely filly he would like to see perform. You have the option of checking

out a couple of still photos to help you make up your mind. Then, the girl discreetly inquires how much money you're packing ("So, how much cash you got?") and the user has to decide how big a tip he's willing to pony up. CD-Rom technology hasn't progressed to the point where cyber-dollars can be tucked into cyber-G-strings, but the user does run the risk of being verbally abused if he's not generous.

A very sedate two-to-three minute clip follows, at

which point the user is given the option of slapping the "Let me see more!" button. Another round of negotiations follows and then another, slightly raunchier clip which concludes with the dancer in her G-string. Then there's one final round of negotiations and the dancer finishes up. If you end up spending more money than you've got in your "wallet" (and you aren't told how much that is), you get kicked out of the "club," but, so what? Load it up and start again.

A CD SLICE OF LIFE

If you have ever had a fantasy involving your wife's best friend, or your wife and her best friend, then this CD was made for you. *See Some 3 Some* another in the growing category of R-rated games that actually require skill and make you earn your victories.

The action starts with finding your wife in the shower, only to discover that she is not feeling quite as amorous as you might hope. You decide this might be the perfect opportunity to put the moves on your new secretary and that is where the fun begins. You are faced with a series of choices, each one offering you the bliss of acceptance and the humiliation of rejection. Just when you think you've got the game figured out, it throws you a curve. Sometimes the rewards come for being aggressive. Other times you get over by playing the sympathy-deserving husband.

The video quality in this game is decent, but the game play is virtually addictive. Each scene requires anticipating maddening swings in what the particular woman wants you to choose. How's that for virtual reality? If you play your cards right, you will find yourself involved in the title

role. More likely than not, you will have played the game several times before you get there.

There seems to be a positive trend with the increasing frequency of adult-CD publishers producing good games with adult themes. *See Some 3 Some* epitomizes the kind of game play that separates the truly interactive from a veiled interface for recycled video clips.

—Ed TSUNODA

SEE SOME 3 SOME
LSU INTERACTIVE

women are your cup of saki, then

—TOKYO GLAMOUR GIRLS

The girls are all very attractive and are obviously accomplished dancers. It's not clear why this is a Texas table dance since Texas doesn't seem to figure too prominently. The music doesn't even have a country-and-western flavor. In fact, the CD's main problem is the generic synthesized music, which doesn't always match the mood of the dancers' movements.

The controls are simple and straightforward and though the program will run on 33 megahertz 386, the image quality is jerky at that speed. —JEFF LANG

MIND TEAZER

VIVID INTERACTIVE

Start up the program and you're faced with 12 small photos of attractive women in sexy poses. Slide the photo of your choice over to one of three puzzle options (jigsaw, concentration or slider), come up with the relatively easy solu-

tion, and you're treated to a very X-rated video. That's as interactive as this gets. From then on, all the viewer gets to do is watch and enjoy the action.

Unfortunately, since so much of that action is pretty much the same, and the accompanying moan-and-groan sound track becomes progressively more annoying, it's difficult to see how this will hold up to repeated viewings. Most of the videos are just one man and one woman, going at it. These scenes have not transferred well to digital and are thus frequently jerky and washed out.

There are a few bright moments, best of the lot being an amusing clip with three women together on a spiral staircase, but this is a disappointing offering overall.

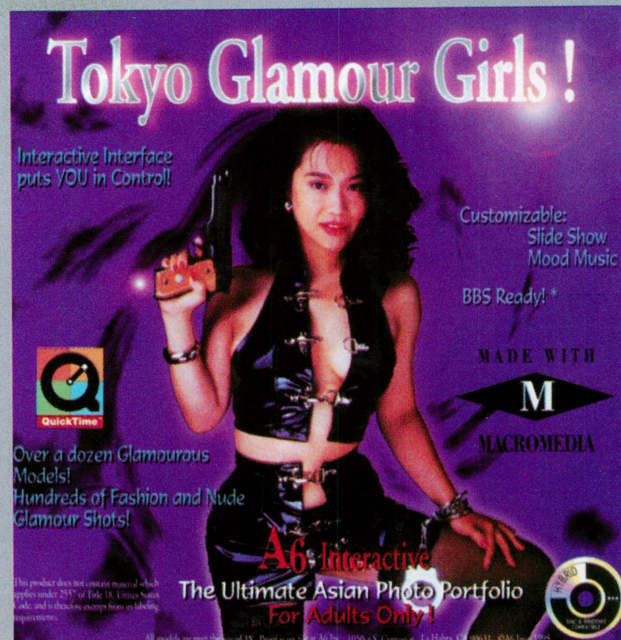

—JAY JACEY

X-rated

moan

and groan

—MIND TEAZER

THE ROM OF ASIAN DELIGHTS

Since models Chiaki Komatso, Minami Takakura and Shiori Makimura are not exactly household names in the United States (and I wonder if they are any better known in their native Japan), the sole question facing the potential purchaser of this R-rated picture is disc is how glamorous are they? That, like any other aesthetic value judgment, is in the eye of the beholder.

What *Tokyo Glamour Girls* provides is 18 models, in varying degrees of dress and undress, for a total of around 275 photos. These are only mildly erotic pictures, even when compared with *Playboy* or *Penthouse*. For example, only one shot shows pubic hair. Some of the girls are quite pretty. A few pictures will appeal to the leather-and-handcuffs crowd.

The interface is simple. You choose the girl(s), you click on the picture(s) (each model has between five and twenty-eight poses), you choose the background music (heavy on the bass and light on melody), and decide whether you want to view them in the order selected or randomly, in any of three speeds, as your private slideshow. The overall quality of the pictures is quite good, and an undocumented program allows you to customize the background as you wish.

In addition, all the photos are in both GIF and JPEG formats, and the program gives users royalty-free rights to upload them to a BBS. I found this to be one of the more attractive aspects of the program. *Tokyo Glamour Girls* certainly achieves its limited aims. If still photos of topless Japanese women are your cup of saki, then drink deeply. Otherwise, save your yen.

all Rom Antics disks are MAC & IBM COMPATIBLE

what's my **LIPS**

Billed as,...an interactive game..., providing...hours of fun, *Nasty Parts* does a reasonable job of living up to that billing. This is one hard game.

You are greeted by your fabulously sexy host who lays out the ground rules for the forthcoming action. Unless you are a true connoisseur of adult video, extremely lucky or have a photographic (pornographic?) memory, this is the last time you will see any action for quite some time.

The game shows you a full screen still of a popular adult video star: "Here is Selena Steele." Then it asks the player to match a thoroughly unrelated picture of one of her body parts: here are 30 pairs of breasts, which ones are Selena's. Each time you choose the wrong breasts, lips, or other identifying body parts the 30 pairs are scrambled and you have to start again. In the course of a lifetime, one is likely to

become fairly familiar with *several* breasts. It would be an impressive feat to identify those breasts from a book of jug shots. It is next to impossible to choose the correct set when you have not had the required hands-on experience. After randomly selecting five or six pairs, you are booted from the game and verbally abused by your hostess.

Should you happen upon the correct set, you are presented with a high quality video, featuring the star and the part of her anatomy you identified.

If you have seen every adult video ever, several times, this

game would still provide a challenge. So, while the picture, graphics and video quality are excellent, you will probably end up using your video player to watch them.

Adult CD Rom's can be broken down into three basic categories:

Picture Discs - Taking advantage of the vast storage capacity of CD Rom, many high resolution images can fit onto one. These discs contain their own viewing utilities, but any good viewer like VPIC works very well. Some of the best examples of Picture Disks are: **Busty Babes 4, Private Photodisc #1, and Select-A-Pet 2.**

Interactive - Means you actually 'interact' with the program by making choices that affect the outcome of the next scene. Today's Interactive titles are full-fledged games with adult themes and explicit action. The best examples of Interactive Adult CD's are: **The Interactive Adventures of Seymore Butts 2, Virtual Sex and Space Sirens 2.**

Movie Discs - Just what it sounds like, adult movies on CD Rom. Many of these disks are the full-length movie. There are exciting new interactive interfaces that include freeze-frame blow-ups, full screen video and other ways to customize the videos to your personal tastes. Some of the best examples of Movies are: **Justine, Elements of Desire and Blondage.**

Shane, Shane, Shane

Last year's The Interactive Adventures of Seymore Butts marked Seymore and Shane's first foray into the Adult CD-Rom market. The pair have been blazing a trail ever since. The devilish duo have reached near legendary status as their professionally produced/amateur actress style has carved a niche for itself.

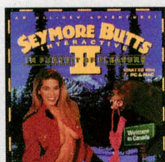

The Interactive Adventures of Seymore Butts takes you on a journey through Mr. Butt's neighborhood giving us the opportunity to help him sweet talk the local beauties. Each decision leads you down different paths towards Seymore's inevitable close encounter of the Shane kind.

In the Adventures of Seymore 2: In Pursuit of Pleasure, Seymore sets a new standard in adult game play. The state of the art video quality and of course the seemingly endless number of incredibly beautiful women have made this 2 CD set the number one selling adult interactive CD.

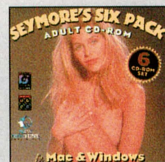

Now just when it seems there will never be enough footage of Shane, New Machine releases The Seymore Six-Pack (On the Loose, Playing with Fire (2CD set), Do Ireland and Meet Kathy Willets (2CD set)). 6 CD-ROMs that contain the hottest, most incredible Shane-filled-fun movie discs you could ever hope to see. This set furthers the legend of Seymore and Shane as they redefine up-close and personal. Rumor has it 1996 will bring us a "Seymore 3" and we can hardly wait.

See Some, 3 Some

R H \$49
In this hilarious adventure you help the main character through a day filled with erotic excitement.

Space Sirens

X H \$49
You venture into the domain of the alluring and beautiful Space Sirens only to realize that you've been entrapped in VR chamber to fulfill their every desire.

Space Sirens 2: Megababes from Aja

X H \$59
You've encountered the Space Sirens and lived to talk about it! Now you must face the challenge from an even deadlier alien.

Spring Break Fantasy

X H \$24
Watch as the innocent college girls and the not-so-innocent strippers get into the spirit of spring break and show it all for our camera.

Spring Break Girls

X H \$24
Meet the girls of spring break as they head to the fun and sun of southern Florida.

Strip Poker Professional

R D \$49
Play Strip Poker against four beautiful opponents, each with her own personality and style of play.

Stripper P.I.

R H \$49
Investigate 20 of the hottest strippers "undercover".

Super Hot Adult 6 Pack

X H \$49
Contains Doors of Passion 2, Massive Melons, Sensuous Girls in 3D, Double Down, Touch Me, Feel Me and Private Screening.

Texas Table Dance

R H \$39
Are you experienced? The sexiest strippers in Texas invite you into the night at a famous Gentleman's Club. Match wits to win!

Tokyo Nightlife

X W \$49
You rent an apartment in virtual Tokyo. You can do just about anything.

Vampire's Kiss

X H \$59
Journey through the corridors of the vampire's ancient 3-D castle.

Venus' Playhouse

R H \$39
Venus De Light (six times Miss Nude Universe), two Miss Nude Worlds and three Penthouse Pets star in the most advanced interactive and lavish CD Rom ever produced.

Virgins 2

X H \$49
Five new ladies tell you what turns them on and what they want you to do to them. Features 2 hours of entertaining video, Full Screen, Full Motion, High Resolution.

Virgins 3: Temple of Virginit

X H \$49
Come inside and experience 5 beautiful women. Their first touch. Their first kiss. Their first time.

Virtual Director

X D \$35
This is the first adult title that puts you in complete control so that you can truly see what your imagination can do.

Virtual Photoshoot I

R H \$59
You too can have one of the most envied jobs in the world, Penthouse magazine photographer! Round out your collection with volumes 2 and 3!

Virtual Photoshoot 4

R H \$59
Seana, Bonita and Tiffany. Three sexy Penthouse Pets wait for your instruction. But this time they've brought a change of clothes and an attitude.

Virtual Sex

X H \$49
This game should only played by skilled lovers. Your ability to satisfy a woman properly advances you to total satisfaction.

Virtual Sex Shoot

X H \$59
Footage was shot exclusively for this CD. Uses new Quicktime VR technology with SGI quality and 3D graphics.

Virtual Valerie 2

X H \$49
The long awaited sequel to the best selling adult CD ROM in history. Features a 3D modeled Valerie in a series of highly erotic scenarios.

Virtual Vixens

X H \$39
You must save your friend from the evil Crystal, who has imprisoned him in a VR Pleasure World, for his failure to please her.

Virtually Yours 2

X H \$59
Monique is back and is nastier than ever.

Where in the World are Dick & Jane

X W \$49
Test your knowledge with the most gorgeous girls the world has to offer, as well as following the sexy and intimate episodes of Dick and Jane. Geography class was never like this!

Winner Take All

R H \$39
An engrossing interactive adult video game of chance. Play roulette as you have never played before. Racquel, Justine Lenay, Ginger, Nikki Dial, Ashlyn Gere.

Siren Call ...

From the original Virtual Vixens through the current release of Space Sirens 2: MegaBabes from Aja, Pixis Interactive has kept us on the edge of our seats. This series has featured the evolution of the Touch-and-Feel-User-Interface (TFUI), touted as being "...as close to genuine VR sex as current technology will allow."

Virtual Vixens brought us our first look at the combination of live motion video and intense 3D graphics that has made this series so popular. Vixens gives new meaning to the phrase, "reach out and touch someone."

Hot on the heels of Virtual Vixens comes Virtual Vixens 2: Space Sirens. Better looking graphics and more of the beautiful women we've come to count on Pixis for: Space Sirens brought an improved TFUI and included some of the best Sci-Fi animation around. The interface is even more intuitive and brings you so close to actually being there you can taste it.

Now Space Sirens 2: MegaBabes from Aja has combined the best of all possible worlds. The latest TFUI technology gives you the most control ever. The Aja sector is home to the most beautiful vixens yet, but they bring a whole new twist to the scenario. This time, if you fail to please her, she whips out a huge gun and blows you away.

The Virtual Vixens/Space Sirens series has and will continue to define the cutting edge of adult CD entertainment.

Adventures of Mikki Finn

X H \$49
The world's first CD ROM to feature the Interactive Entertainment Theatre Interface.

American Blonde

X H \$49
A tale of three lovers, and the sexual energies that ignite them. Starring the impossibly beautiful Janine. Also Kaitlyn Rain, Colt Steele, and Alex Sanders.

American Built

X W \$29
The 90's are in and it's definitely a new model year! Legend has Nikki exclusively care for a ride?

Anal Asian 2

X H \$29
The Won Ton Women, Kitty Young reveals the steamy secrets of the orient.

Babes Illustrated 2

X H \$34
The Babes of Intropics have found paradise in a moist little garden down south. Starring Kaitlyn Ashley, Sylvia Ryder, Micky Lynn, Melanie Moore, Chrystal Wilder, Brooke Water, and Felicia Star.

Baby's Got Butt

X H \$29
Those lovely scoops of flesh that top off the thighs like ice cream on a sugar cone. One look at Baby's Got Butt and you'll have a hard time keeping your hands off your disc.

Beverly Hills 90269

X H \$29
Returning home from college during Spring Break, Brenda soon learns how easy it is to catch up on extra-curricular activities. Stars Deidre Holland.

Big Boob Babes

X H \$39
Footage was shot exclusively for this CD. Uses new Quicktime VR technology with SGI quality and 3D graphics. The HQ digital video technology gives a quality full screen image.

Blackbroad Jungle

X H \$29
First, Dick Daddy-O went to witness protection, then became a schoolteacher. This is one college of sexual knowledge.

Blondage

X H \$29
In true club Vivid style, there is always a room for Blondage. Starring Janine!

Blondes Brunettes and Redheads

R H \$19
Twenty Famous Models in eight poses, each with full detail intimate zoom.

Candy Snacker

X D \$29
Kelly O'Dell is the star of F.J. Lincoln's movie and she has a craving for chocolate that she has to satisfy.

Chateau de Passion

X H \$34
Natcha is a sensual young woman whose mind is aflame with erotic dreams and bizarre happenings.

Cheeks

X H \$29
An all-out buttstravaganza with no storyline to deter you from your prime objective. It will have you squirming in your seat.

CyberStuds

R H \$39
An electronic collection of hundreds of the world's most erotic men. Contains full motion video of various contests and events.

Darker Side of Shayla

X H \$29
Now the true side of Shayla comes out as we explore some of her darker fantasies. Watch as Shayla and her cohorts shock, disturb and astound you.

Dirty Western 2

X H \$29
It's the Old West, 1851 style. Five beautiful working girls on their way to windy San Francisco meet four sex-starved outlaws and the stagecoaches get rockin'.

DynaStud

X H \$49
Enjoy the hottest moments from the Dynastud movies.

Elements of Desire

X W \$34
Featuring exciting interactive interface programming that allows the viewer to experience an Erotic Masterpiece. Starring Julia Ann, Celeste, Shayla, Laveaux, PJ Sparxx, Daisy, Deidre Holland, Maeva, Paula Price, Tiffany Minx, Misty Rain, Asia Carrera, Dyanna Lauren, Tracy West, Victoria Andrews.

Exchange Students

X H \$34
Meet Niki from Down Under. She's in the US and to pay her way she helps around the house and a little more.

Forever

X W \$29
Delectable Delbert and luscious Loretta were so in lust the only logical thing to do was tie the knot. But, when the honeymoon's over, it's really over.

Ginger Unlimited

X H \$29
Starring Ginger Lynn, John Holmes, Harry Reems, Jamie Gillis, Christy Canyon, Marc Wallace, and Peter North.

Hidden Obsessions

X H \$29
Andrew Blake's full length feature film in QuickTime format. Penthouse's beautiful Janine Lindemulder stars in Blake's most ambitious film to date.

Hooter Hunt

X H \$29
Nine of the BIGGEST names in Adult Video help you find what you're looking for: Taylor Wayne, Tonisha Mills, Angela Summers, Leanna Fox, Crystal Wilder, Alicia Rio, Heather Hart, Peter North.

John Wayne Bobbitt Uncut

X H \$29
See the entire story in a completely uncensored, uncut, full motion CD ROM.

Justine

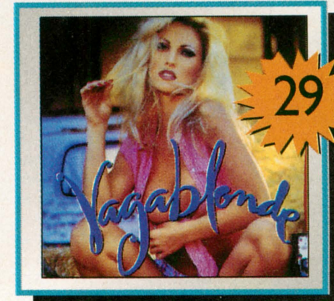

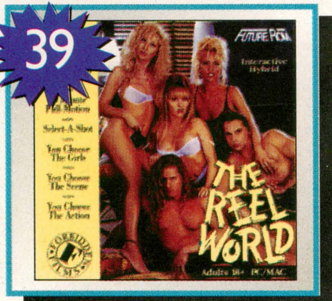

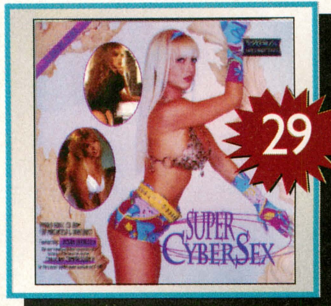

X H \$39
Mike Horner and Nick East are father and son, both searching for that special woman. Roxanne Blaze, Tianna, Lacy Rose, Dyanna Lauren, Brad Armstrong and Alex Sanders.

Kelly Eighteen

X W \$29
Welcome to Kelly Eighteen, which has it all, including limousines, strippers, smoky lounges, chases, suspense and hidden identities.

Lady in Spain

X H \$34
Feel the sensual heat when three gorgeous girls win a fantasy weekend in sunny Spain. I bet you can guess what they are going to do on the Costa Del Lust.

Legs Lace and Lingerie

R H \$19
You have seen these women in the movies, on TV and in print. Now they talk to you.

Lust Connection

X W \$39
You are in complete control of four lovely & willing women. 8 hours of video. Imagine the possibilities.

Mystique of the Orient 2

X H \$39
East meets West continues. Asian beauties, like Mimi Miyagi, show us the best of both worlds in this sizzling sexual romp to the far East.

New Machine 6 Pack Vol 2

X H \$49
Contains A Taste of Erotica 2, Legends of Porn I, Asian Palate, Night Trips 2, Lovers Trance & Go Digital!

New Wave Hookers II

X H \$29
You'll thrill to Prophet Willie and his bevy of hot hookers! You'll sneer at "L" the de-programmer! Starring Savannah.

Oriental Action

X H \$29
Featuring some of the most popular oriental starlets and their best footage for this CD ROM. Mai Lin, Kristara Barrington.

Passion Files

R H \$19
Experience the erotic tales of the Neuro-Dancers, a Digital Movie inspired by the interactive game NeuroDancer.

Pleasure Zone

X H \$39
Unlock the secrets of the Pleasure Zone. Racquel Darrian, Janine, Kelly O'Dell, Ashlyn Gere.

How to Order

Phone in your order
Toll Free 800-999-7995
or 201.783.3600

Our staff will offer helpful suggestions and process your order swiftly.

Send it to us, let us do the work!

By mail, E-mail, or Fax it's easy to order from Mission Control. Use our pre-printed order form. Then fax it to us at (201) 783-3686 or mail it to us at: Mission Control, 7 Oak Place, Montclair, NJ 07042. Or you can browse through our CompuServe store at GO MCS, place your order online, or you may reach us at missioncd@aol.com NJ residents, please include 6% sales tax. Be sure to check that you have signed the order form.

Payment

We accept VISA, MasterCard and Discover Card. Personal checks held 14 business days to clear. Money Orders, Travelers Checks and Certified Checks are treated as cash and not subject to hold. Please inquire about direct wire transfer service. No COD's or Purchase Orders accepted. First time orders must ship to the billing address of the credit card.

Domestic

Continental United States served via Airborne Express. All orders shipped discreetly. Overnight delivery to most addresses for \$700, all other addresses by second business day! Alaska and Hawaii, Airborne Express \$1700. P.O. boxes, rural routes, FPO's APO's, Alaska and Hawaii served via Priority Mail, for only \$5, please allow up to one week for delivery.

Foreign

We ship DHL worldwide. Up to 8 CDs, \$2500. Please allow three to five days for delivery. To Canada we ship via DHL \$900+\$500 VTM, please allow three to five business days for delivery. When you receive your order, be sure to open the titles completely as we may combine titles or repackage them to conserve space and weight. Do not return any goods without contacting us first.

Guarantee

Same-day shipping on all orders via overnight courier. If there is a problem with your order or with a product, please call us immediately at (201) 783-3600. If you need to return a product, you will be issued a return authorization number (RA). This number must be placed on the outside of the package, near our address. Without an RA your package will be refused. All defective titles will be exchanged for the same item only. All other returns subject to a 20% restocking fee. Allow 24 hours for order processing.

Time

All shipping times subject to availability. Any backordered item will be shipped at no charge for shipping when in stock. This excludes pre-released items and foreign orders. Large orders and accessories may be subject to additional shipping charges depending on weight and size. Mission Control cannot be held responsible for items seized by customs. Questions concerning system requirements should be addressed at the time of ordering, no credits will be issued for problems relating to incompatibility.

Names and information are held in strict confidence and will never be given to other sources.

1-201-783-3600

For first time credit card orders, we must ship to your credit card billing address.

Digital Erotica 3, the new Pixis sampler, features a taste of some of the 'best adult CD-Roms available today.' These include *Space Sirens*, *NeuroDancer*, and *Scissors & Stones*. It also contains stills of some of the future Pixis releases, such as *Maxxx*, the *Naughty Dog*, *Diva X* and

which allows the user first-person interactive control over the game. This is the centerpiece of most Pixis Interactive titles. The sampler offers a demonstration of the interface, but the users do not get a chance to try it out. This leaves the viewers a little less impressed than they might be

less celebrated aspect of the Pixis mix, clips from several Pixis movies like *Passion Files*, *Sex & Money*, and *The Red Chair*. Pixis does provide full access to its sampler through a stupid-proof user interface (SPUI?) that installs easily, works easily, and does a great job of making you wish you had actually bought one of their interactive CDs. The titles demonstrated here show the quality graphics, great video and truly excellent original scoring that make Pixis titles a class above.

CYBERSTUDS

MOMENTUM/CRESCENT

Prior to viewing the adult interactive CD-Rom game CyberstudS, the only Playgirl product that I was familiar with was the actual magazine.

Not that I bought it for myself, mind you.

Really.

See, my friend Bruce had a powerful hankering to see the cover boy in the all together, but as it

was shooting for heterosexual women or homosexual men.

"Oh, they must know that men buy this magazine," Bruce gushed. "I would not be surprised if they weren't really aiming for a female readership. They must be aiming for men."

Well, Bruce, I just took a trip with the CyberstudS.

SURPRISE!

Though the introduction says that CyberstudS is

"a CD-Rom for those who appreciate men at their finest," CyberstudS is deeply and truly gunning for the girl audience (unless, of course, homosexual men like being called "feminine" and compli-

mented on their lovely breasts. Hmmm).

was Kentucky and Bruce was shy and I was susceptible to bribery...

You get the idea. I remember talking to Bruce later about whether Playgirl

was shooting for heterosexual women or homosexual men. The opening screen presents you with four options. One is a crown, which will give you the choice of four

PRISON NEVER LOOKED SO GOOD

Private Prison combines two pretty disparate genres hardcore: adult films and arcade style video games and manages to make it work, mostly because of a clever backstory and well planned interface system.

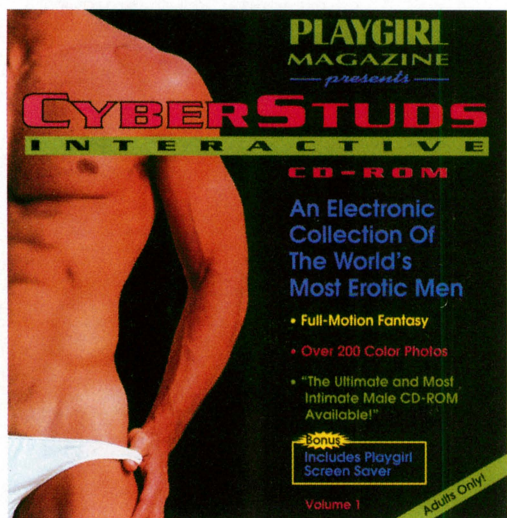

The backstory: you're in charge of a luxurious women's detention center with no cells because the prisoners are wired to explode if they stray too far away. As the warden, you can use the closed circuit TV system to watch the women pursue their interests. But oh, no, the video system is down and you have to repair the lines to each camera if you want to keep an eye on your charges.

The process of fixing the links to the cameras is where the arcade style video game comes in. In each of the seventeen puzzles, the user has to avoid monstrous ants and rapacious women while moving reflectors that will bounce the signals to the correct receiver. We're not

dancers in a strip club. When you choose one, you are gifted with a MCI movie showing the studs bumping and grinding and the female audience appreciating the gestures.

There are a million stories in the naked city, and if you

pick the Cyberstud City option, you can choose between about a million bitmaps. The Playgirl Blimp button (Playgirl has a blimp?) will gift you with even more ("Jungle" man actually gets a Jane). The interactive fun begins when

Some film segments are hot and some are just plain silly. ● ● ●

—DIRTY DEBUTANTES

talking about The 7th Guest here, but the puzzles are just challenging enough that the reward watching the adult video clips is satisfying. Each of the seventeen clips is only three or four minutes long and though they'll run on a 386 machine, get yourself something faster unless you like your video grainy and jerky.

The user has the option to play the game with English, German, French, Spanish, Portuguese, or Swedish captions and subtitles, a nice innovation. The computer animation is quite good and the interface is easy to use.

All in all, Private Prison is a lot of fun. Things sure have come a long way since the happy little animations between levels of Pac Man.

—JEFF LANG

PRIVATE PRISON
NEW MACHINE

you select curtain number four, phone sex!

Once you dial into telephone titillation, you get your choice of four scripts (iconized by four different lovelies, but voiced by the same guy). Now, you can either sit quietly and listen,

or you can make good use of your digits and select a photo montage to accompany the narrative. Mix and match! Hunt and peck! Boys and girls! I wonder what Bruce would think. Hmmm....

Cyberstuds: Chicks Dig It

—RUTH MORRISON

DIRTY DEBUTS

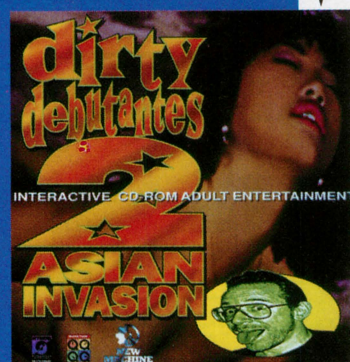

The second interactive CD-ROM offering by impresario Ed Powers, like the first, focuses on the first on-screen performances by various actresses. On this CD, all of the women are of Asian extraction as the title would suggest. The scenes almost always co-star Powers himself. Unfortunately, only two of the women really seem to be enjoying themselves, and by the end, I felt uneasy. Sure, one expects XXX-rated films to be exploitive of women, but most showcase the female performers' abilities. Here, for the most part, they were treated as interchangeable game pieces.

Dirty Debutantes: Asian Invasion consists of six long film clips, starring women ranging from the accomplished Cassandra Dark (in the sole segment where Powers is not an on-screen participant) to an anonymous woman from Borneo, who spoke no English. In between, in the sole interactive portion of the program, you get to choose between two "menu" items and view short cut-out film segments, some hot and some just silly.

This is Powers's show from beginning to end, which is a large part of the problem. He introduces each segment inexplicably dressed in fatigues set against blue-screened in backgrounds. This evokes images of Viet Nam and World War II, which sends a very strange message when juxtaposed with sex scenes featuring Asian women. He cracks jokes which are never funny. And his technique as both a director and sexual performer leave a great deal to be desired... as illustrated by the bored look on Ricky Linn's face.

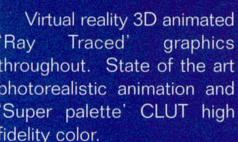

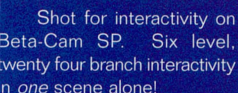

The camera work is primitive, the music almost non-existent, and you can't fast forward to the "good parts" or pause the proceedings. All you can do is sit back and watch, and this program is, frankly, just not that watchable.

IQ REVIEW

It's no fun to
lose your
underwear to
your
computer.

A winning hand in poker is a great feeling. A winning hand in strip poker when your opponent is beautiful woman is darn near euphoria. The challenge with the Cyberstrip Poker and Cyberstrip Blackjack games by Rapture Interactive is that you have to be a really good card player to feel that exhilaration. As opposed to so many games in the adult field that provide a mask of interactivity to get the player to the erotic action, these two games were designed to challenge the player rather than merely titillate. They can be so difficult to win, they sometimes seem rigged.

Each game opens with the same elaborate animated introduction. Players are greeted as if they just boarded a futuristic casino,

reminiscent of gambling riverboats. It's a pleasant experience being greeted by the affable station director Mr. Jericho, but the real reason to board this futuristic casino is not to talk to other men. Fortunately, most of the animation and fluff can be bypassed with the mouse.

The Poker and Blackjack games both entice players to challenge gorgeous women dealers in card games. Users get to choose from a blonde, brunette or red head. You come on board the station with a pocket full of electronic cash and try to beat the dealer's hand (of cards, that is). Deplete the dealer's \$1,000 bank and she'll strip an article of clothing in a provocative flourish. If she depletes your bank, you have to lose an article. Fair is fair, right?

The bummer is that once the dealer loses an article of clothing, her bank account shoots right back to \$1,000. That means you have to get her to lose another grand before she takes off another article of clothing. And these women seem to wear a lot of clothing.

You don't even get to play an extra hand with the naked dealer. She's nude for about a minute and suddenly you're back in the lobby with Mr. Jericho. Talk about unfulfilled fantasies.

Everyone loves a good challenge. It may be that these CD-Roms test the limits (and patience) of the player.

Shane shows
the stuff that is
quickly
making her a
legend of
adult CD
entertainment.

These days interactive sells. Companies use the buzzword to describe a horde of commonplace video players. There should be another classification for full fledged adult video games like *The Interactive Adventures of Seymore Butts 2: In Pursuit of Pleasure*. Once again, Seymore has pushed the envelope with a two CD set that will keep you on the edge of your seat for hours.

The action starts as the incredibly ravishing Shane is deported to Canada. Your mission is to help Seymore acquire the necessary funds to buy a ticket and fly to Canada to be with Shane. As Seymore, you attempt to raise the money by hooking up friends with beautiful women and asking for a loan while they are reaping the

benefits of your quest.

The all-original footage is flawless as you inch closer and closer to your eventual goal. Unlike the first Seymore CD, you may very well stop short of victory in this game. You can lose by falling short of the necessary funding, being rejected by too many women, or even running out of energy by the time you get to Shane.

Butts packs the game with beautiful women of every size, shape, race and demeanor. Finding the key to each woman's... err... heart requires a different

when you finally reach Canada. In a couple of different end-games, Shane shows the stuff that is quickly making her a legend of adult CD entertainment. This variety makes the game playable even if you have already tasted victory. In case you still find yourself wanting more Shane (Hey... get in line), New Machine encloses a pre-paid phone card with the CD, complete with a 800-number where Shane will describe an additional adventure for just \$1.50/minute.

From the gameplay, graphics and video to the

Seymore & Shane LEAD THE WAY

approach. Discovering the correct technique results in outstanding videos that stay true to Seymore's videotaped- some-friends-having-sex style. It features a bevy of women who get it on for the camera while visiting Mr. Butts' Neighborhood. However, the few adult entertainment veterans he uses detract from the amateur-actress/professional-production dichotomy that has become the Seymore Butts trademark.

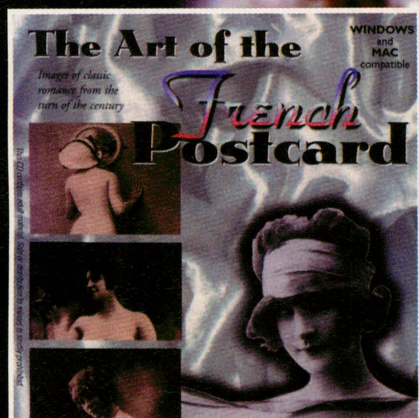

The game doesn't end

variety and beauty of the women, this clearly sets a new standard. Even after you have beaten the game, it is still fun to play. If you want to see how far technology has come, let Seymore and Shane show you.

The story can
be seen from
three
perspectives,
injecting a
Rashomon-
like element
into the mix.

This is such a natural, it's kind of astonishing no one has done it before. Comic book characters have been

Comix for the Computer Age

used in software for years and years. There are Spiderman and X-Men screen savers, games based on well-known characters from Superman and the Hulk plus fan-boy faves like Turok and Prime. But as far as I know, Reflux is the first original interactive CD-Rom to use all of the conventions of the comic book and expand on them

for the new media.

Reflux succeeds in most cases. The story, which combines aspects of cyberpunk with a Taiwanese chop socky flick is just convoluted enough to get under a pulp fan's skin, and the concept certainly will. Click on some frames, and the "fu-ware," the comic's virtual martial arts, come to life. The painted characters, necessarily, look like the main character's used in the film, and the films settings have to be folded into the story, but the disc's creators handle this gracefully.

The chore of making something like Reflux must be daunting. After all, the creators are going to be judged on so many things. There's the comic book aspect: Is the story compelling? Is it told

That's a lot of people to appease at a lot of different levels.

Beyond that, Reflux uses the expanded possibilities of the computer to inject a sort of Rashomon-like element into the mix -- the story can be seen from three different perspectives, changing the way they tell it with a click of the mouse. You can see it from the point of view of Flux, the main character or Flux's digital assistant IQ (gotta love that name), or an unseen (at least in this issue) headhunter who is chasing Flux down and setting a variety of traps for him.

On the down side, the play can be a bit slow (especially on a 486-33). Sometimes it seemed that I could click and click "like a mad dog" as the liner notes advise and nothing would happen. And often, my machine would freeze up. I'm willing to give the software more benefit of doubt than my machine, however. And to the software's credit, the story, interactive fun and even the remarkable free jazz score were all compelling enough to keep me rebooting the thing. —HANK BORDOWITZ

VIRTUAL VEGAS

theme park in cyberspace

A million years ago when I was in high school, my boyfriend had a copy of a primitive blackjack game. When you won, the dealer, (a simple drawing of a woman), would say something via word balloon, ranging from 'damn' to 'shit' with an occasional 'ha-ha' thrown in for good measure.

by

Ruth Morrison

"Every disk we
release is the building
block for the entire
world. Eventually,
we're going to have
a complete city.

Technology has come a long way since then. My high school boyfriend was considered a wirehead because he had a computer. Now people talk about hard drives over dinner. The Internet was the stuff of science fiction; now I send e-mail to my grandma. And remember that silly little gambling game? Aw, honey... "We're a bunch a multi-media guerrillas who really love what we do," Electromedia's Master Software Guerrilla John Bates asserts over the phone from his desk in California. Even well past nine in the evening, Bates is constantly interrupted by people still in the Electromedia offices. Both he and Dave Herschmann, founder of Electromedia and creator of the concept behind *Virtual Vegas*, shoot from the hip.

They're so honest about what they're trying to do, it's almost... scary.

"We wanted to build a place that's at the center of all this, of 'cyberspace,'" says Herschmann. "We wanted to come up with a cohesive concept. The hot market right now, and the future of entertainment itself, is in the virtual world, where people can explore without recrimination."

Welcome to the world of *Virtual Vegas*. The documentation tells us *Virtual Vegas* is "the first in a continuing series of adventurescapes. More than just a CD Rom game, this is an invitation to an entirely new interactive experience. A place to explore, play and enjoy. Free from the laws of physics, time, space, or the mob, *Virtual Vegas* is sure to become the most popular stop on the information highway."

"The main thing that you should know about *Virtual Vegas* is that it's not just one game," states Herschmann. "We are actually building a theme park in cyberspace. We're building the interactive equivalent of an amusement park, but for adults."

"People may not realize it, but *Virtual Vegas Blackjack* is far more sophisticated than any game they have ever seen." *Volume One: Virtual Vegas* is the only issue of *Virtual Vegas* currently available

on the retail market. For those of you with Mosaic or another World Wide Web 'internet browser,' visiting Vegas is as easy as www.virtualvegas.com. *Volume Two: Virtual Vegas Craps*, and *Volume Three: The Ms. Metaverse Pageant*, will be available in the coming months and all will inter-connect.

"Every game company with a successful product makes a sequel," explains Herschmann, "but that's not what we're trying to do. We're trying to build a place. Every disk we release is the building block for the entire world. Eventually, we're going to have a complete city."

Right now, the CDs and the online service don't have an interconnection, but don't rule out the possibility. The software guerrilla forces at Electromedia are looking into it.

"More and more," Bates says, "people are combining CD-Roms with online systems to give you great graphics and real time activity."

"Here's one example of how we are linking CD-Roms and online services," Herschmann offers. "One of our key titles is the *Ms. Metaverse Pageant*. It's not just a CD-Rom game; it's also an ongoing contest. All real contestants are entered online.

"The theme in both is to find the most intriguing being in the Metaverse," Herschmann continues, "On CD-Rom, the *Ms. Metaverse Pageant* will feature some of the aspects of the online contest. We're custom shooting ten beautiful Hollywood actresses. We're spending hundreds of thousands of dollars. It's cross between a game show and a beauty pageant in the future."

"E-mail's fun, but a chat room is better," explains Bates. "Crank that up, and you can see where we're going. We want a bunch of cyber property and a bunch of unreal estate."

"I would love to communicate to the *IQ* readers," Herschmann says, "that building these adventurescapes and cyber-parks takes a long time. *Virtual Vegas* is a very involved scenario.

"By the end of this year," he continues, "we're going to have a lot more coming out, and it will make it all that much better."

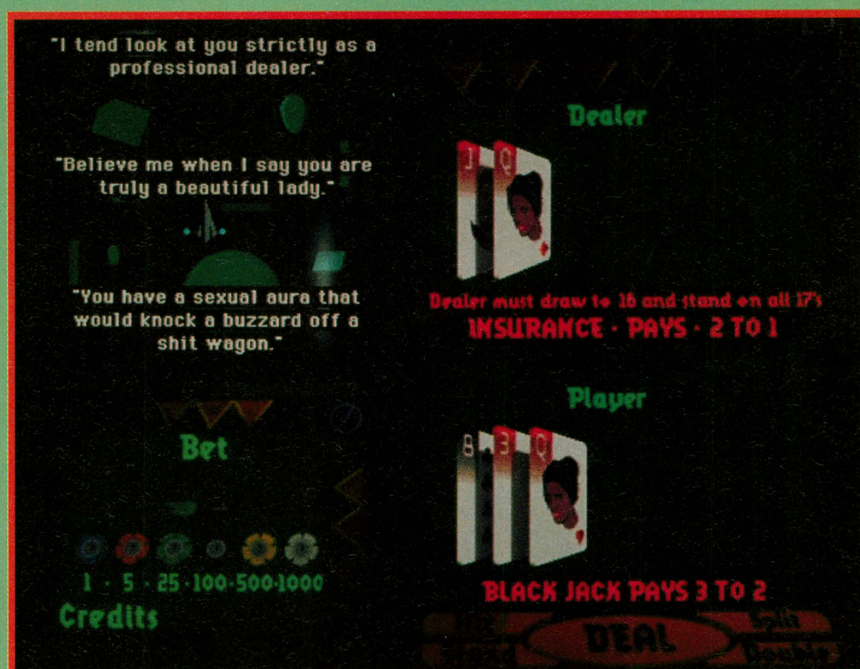

All this and I haven't even had my ten year high school reunion. Neither, it seems, have too many of the folks hanging out at Electromedia. "The median age is 25, 26," says Bates, "and that's one of the things that gives this company an energy that you won't find anywhere else."

This energy translates into the game. What makes *Virtual Vegas* different from games is the level of interactivity, or (to put it in practical terms) how the characters behave. Most games have a few clips that are randomly thrown at the

ever-expanding world of *Virtual Vegas* where you can explore the initial rooms of the casino, and play blackjack against your choice of three beautiful dealers, each with her own distinctive personality." The \$5 dealer is the 'girl-next-door,' the \$25 dealer is a pain in the motherboard and the \$150 dealer is a sex kitten.

"She'll make a comment about how you're playing," says Bates, speaking of the dealers, "and that really turns people on. People love that."

The ladies will coo out comments, and periodically pose questions for you to answer. What do you spend your money on? What's your favorite pick up line? Don't I know you from somewhere?

player, a reward for solving a puzzle, a pay-off for clicking on the right spot. The clips in *Virtual Vegas* come with nearly every hand. You might have to be a programmer to appreciate the level to which the game aspires, but with all this interactivity, *Virtual Vegas* may be "trying to do too much," admits Herschmann. "It's very ambitious.

"There are three computer generated personalities in *Virtual Vegas Black-jack*," says Herschmann, "but there will be more in the upcoming releases." *Volume One* is an introduction to "the

You can play for hours before they ask you the same question twice.

"We wanted to have a fun game," says Bates, "with flirty dealers."

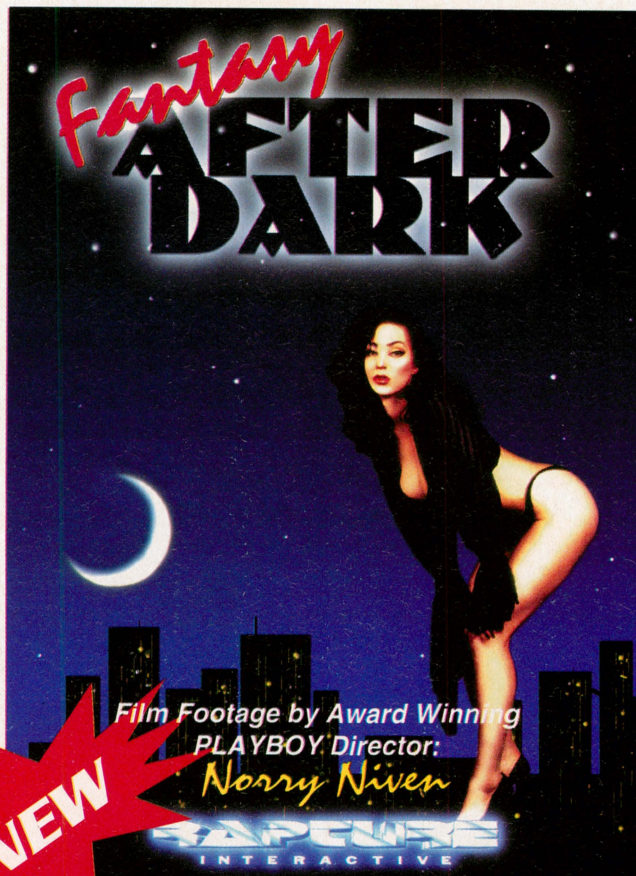

"*Virtual Vegas* tracks about five things, and I don't even know what they all are!" Herschmann exclaims. "We are tracking historical bets, new bets, player responses to the dealers' questions, and other things. The end result is categorizing you in an intimacy level from 1-9. This effects what that the dealers will say to you." How this works in terms of the game, if you bet

know about my question as much as I do. So he locates the programmer (his name gets lost in the hubbub), and redirects my queries to him. The programmer is one of the merry bunch still slaving deep into the night out in California when I'm talking to Bates. He remarks that *Virtual Vegas* will 'come back on itself' but it's not supposed to be noticeable.

"We can't rule out that it may just be your system," says the programmer, speaking of my beloved computer, Cerebro. *Virtual Vegas Black Jack* has a pretty complex engine that tracks what you're doing. But every so often it screws up."

To Bates, this is all besides the point. "We don't have the perfect black jack game," concedes Bates, "but that wasn't our priority. We're pushing the envelope of interactivity. Sure, there may be truer black jack engines. But I would challenge you to find something as fun and interesting on the market, especially with a \$19.95 pick up price."

He has a point there, but hang on a minute. Even if you bet the game maximum of \$1000, win big at the tables and tell the cyber-chippies exactly what they want to hear, let's make one thing perfectly clear. Though that dealer line up boasts a former Playboy Playmate, there is no nudity in *Virtual Vegas*.

"We didn't do it," Herschmann explains, "because we needed to get into Best Buy, Circuit City and Software Etc. Those companies are conservative; they wouldn't have carried *Virtual Vegas Black Jack* with nudity in it."

"We've got a lot of hypocrisy in the marketplace," he continues. "The audience wants racy material, but distributors won't carry it. So we're trying to come up with things that both audiences will be responsive to. We're going to do the best we can with the technology that we have available," says Bates. "I think for our resources, we're doing some cool stuff. Interactivity, that's what we're into. Damn the torpedoes, we're going in!"

IQ

advises that you "Bet a lot and chose the middle-of-the-road answer." That'll make the dealers happy...

"The database engine needs to have a lot of input," explains Bates. "The longer you're playing, the better the interactivity gets."

Now if you are looking for a game that can get you ready to break the bank at

Las Vegas or Atlantic City, you may want to look elsewhere. Bluntly, there are better black jack devices out there, if all you're looking for is a way to tone up your blackjack. Real casinos will vary the number of decks: Cheap tables use up to nine, high stakes go down to two or three, and your average table has about five deck's in play.

Virtual Vegas Black Jack has four decks in play, no matter what. When there are between 25 and 36 cards left, *VVBj*'s shoe is reshuffled.

Maybe it's sour grapes on my part (I cannot seem to "win" money at this game), but it seems to me that I draw far too many twos (and the dealer gets way too many aces). I ask Bates why the hands seem to repeat themselves after I've been playing a while. "I can't answer that," Bates say. "I'm not the programmer." In the typical interview, with your traditional corporate type, that' would shut down that line of questioning. But the Master Guerrilla Bates wants to

\$100 when you usually bet \$85, and your intimacy level is 4, you will get a different response than if you bet \$100, with an average bet of \$85 and your intimacy level was 6. Ultimately, you want to raise your intimacy level, causing the dealers to become a wee bit more friendly (although the \$25 dealer never seems to thaw).

To accomplish this, Herschmann

BABES ILLUSTRATED
ARCUS MEDIA GROUP

Babes Illustrated, Part 2, from Arcus Media Group, reminded me of Elvis Costello's *Girls, Girls, Girls* CD. A CD-Rom movie produced by an out fit called Intropics All Girl, *Babes Illustrated* seems to belong to the all-woman adult movie sub-genre. Unfortunately (or fortunately, depending on how you look at it), the absence of men behind and in front of the camera doesn't guarantee any more in the way of plot, characterization, or act-

ing ability. What you do get in *Babes Illustrated* is

what you get adult movies for—only without men, though it's a sure thing that men were the audience the film makers had in mind. The lightweight plot is a piece of fluff about a swim wear designer trying to sabotage a competitor's new line. This offers many situations to get the actresses into bikinis and simulate photo shoots (I don't know where they fantasized these photos were going to appear, but who cares?) then out of the bikinis. It's a short film—only five chapters—and each chapter is pretty much like all the oth-

ers: a little talk, a little preening, then a long stretch with a lot of moaning.

Arcus Media Group has perfected a simple, easy-to-use interface and does an excellent job of transferring the audio and video to CD-Rom. One particularly nice feature is an icon that enlarges the image area up to full screen. Though the CD-Rom case says the movie will run on a 386DX-33, it just barely does. Cranking up the speed with the fast forward button brings the image up to about normal speed, but then you lose the audio (though *Girls, Girls, Girls* wasn't half bad). Make sure you have at least a 486 or a good audio source.

—JEFF LANG

REVIEW IQ

The lightweight
plot has
actresses
jumping in and
out of bikinis
in an excellent
transfer
with full screen
images.

GOOD GIRL OUT OF CONTROL

It's always a pleasure to find an adult movie that works beyond the primal levels. *Justine* is one of these pleasures.

Transferred to CD-Rom by Arcus Media Group, *Justine* is the story of a young woman torn by her desire for two men—hardly an original plot. The twist comes in that the two men are father and son. Justine doesn't know this until midway through the story. A little heavy on the coincidentals? Well, maybe, but the leads, Mike Horner, Nick East, and Roxanne Blaze make it work. Yes—characters occasionally towel off and discuss what's going on. Blaze's turn as the “nice-girl-out-of-control” is particularly effective.

The film's production values are first-rate, which is fortunate because Arcus' crisp sound and video transfer would have picked up any flaws. The film is divided between two CDs, each with 6 chapter stops for easy scanning. The play-

back interface is simple and well-designed. Anyone who has ever fired up a VCR or laser disc player will be able to dope this out, despite the non-existent documentation.

One minor quibble: the box says the CD will run on 386DX-33 machine, which is technically true but hardly enjoyable. However, the box also strongly recommends a 486. Believe the box.

—JEFF LANG

Out of the
films of Babes,
a soundtrack
soars.

There used to be a joke, perpetuated as recently as the first issue of IQ, about the tinny, cheesy jazz that used to accompany stag reels. The music, like much of what appeared on screen, was low budget, unsophisticated, and trashy.

Times change, and audiences have become much more hip, especially as the stag reels gave way to "adult erotic entertainment." Granted, there's still a lot of trash, both on the screen and the sound track, but there's far more interesting, classy stuff for a far more jaded and discerning audience.

These two discs from Playful soar above a great amount of the drivel that passes for contemporary jazz these days, mostly on the strength of performances by horn player Dino Soldo, who leads both sessions. This guy is a monster musician, and very versatile, as the Fantasy Chamber is a set of rocking jazz and the Erotiques is new age to pant (heavily) by.

If Fantasy Chamber, the

through "Anticipation," the sensual, billowing synths and pulsing bass of "A Satin Ballet," the gently rhythmic "Whispers" and the spunky, swingy, sweaty "Glistening," not to mention, um, "Blindfold," a surprisingly bland, de rigueur tinkly piano track. That's more than amply made up for by the bluesy, Steely Dan-like groove of "Aperitif," a tune for showering, dressing and

Sex & the Single SOUNDTRACK

game, lives up to its soundtrack, Ultimate has a mega-hit on its hands. In addition to Soldo's soaring tenor work, keyboardist Paul Chiten outstrips Steve Winwood early rocking jazz ideas, taking this harmonically far beyond anywhere Traffic went before. On the acoustic piano fueled "Taken By Storm," and the killer soul organ of "A Dream of Betty Page," he brings the idea of fusion back to its roots. The band plays everything from acoustic jazz to the nearly industrial "Deep Blue City."

Only slightly more ambient in nature, Erotiques takes the mellow grooves to get it on by genre up a notch. The titles tell it all; the deep-throated tenor sax yearning

leaving by. And, almost humorously, "Prelude" quotes liberally from Led Zeppelin's "All of My Love," strange bedfellows indeed for a new age album.

Ironically, in addition to Soldo, bassist Jorgen Carlsson, drummer Peter Smith and percussionist Terry Santiel also make up the core of both albums. With players this versatile, there's no way they can even approach cheesy. This is good, solid, soulful music.

Increase Performance.

d-Time¹⁰ SOFTWARE™/95

"If you're interested in increasing the performance of your CD-ROM drive, look no further than d-Time!"

-PC Magazine, January 1995

"d-Time is flexible and intelligent...it's a good alternative to buying a faster CD-ROM drive"

-Charles Brannon, CD-ROM Today 11/94

d-Time uses state of the art, patent pending technology to make your CD-ROM drive perform as fast as your hard disk. Access time is lowered considerably, and d-Time makes Full Motion Video clips flow more smoothly and more realistically. Now you can play the latest multimedia titles on any CD-ROM player with amazing speed!

Call 800-999-7995 or 201-783-3600 • Fax: 201-783-3686

d-Time makes RAM based cache obsolete!

d-Time builds an acceleration file on your hard disk, taking advantage of fast, inexpensive disk space.

d-Time lowers seek times from minutes to seconds.

d-Time has an easy to use installation program, just set it and forget it.

d-Time makes all of your CD-ROM titles run super fast!!

REMEMBER WHEN YOUR 386 WITH 4 MB OF RAM was so powerful you thought those VGA graphics would last forever? Unfortunately, times are a-changing. There's a new standard in town and it may be time for you to upgrade your system.

Making upgrades to your system is

8MB of RAM standard, but if your system is six-months to a year old or older, chances are you got on the boat when 4MB seemed to be more than you could ever want. Whether or not a RAM increase is going to boost your performance is largely dependent on which of these categories you fall into.

While most of today's multimedia software will run on 4MB, the results are often slow and distorted. The latest software is being created to run on the 8MB systems, so more and more you will find that 4MB will limit your choices. It will probably be at least a year before 16MB becomes the standard, so for now 8MB is probably enough.

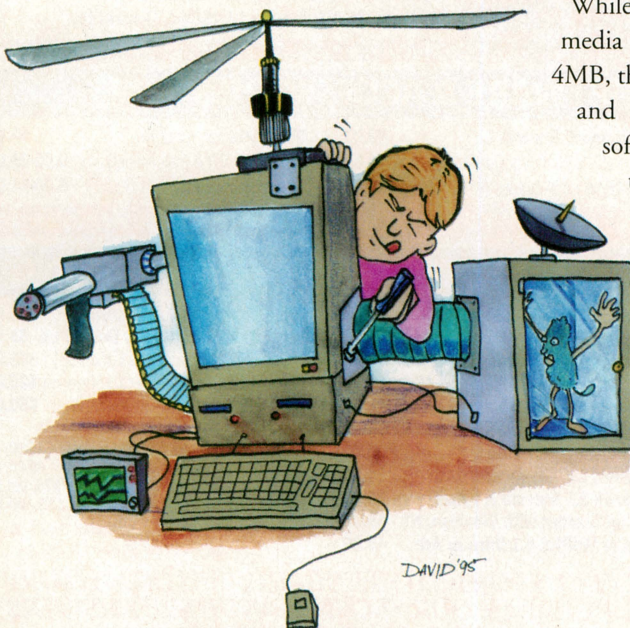

RAM upgrades are relatively inexpensive (\$50/MB) and easy to do yourself. Just unplug and open your system. Then remove one of your SIMMs and

examine it so you get the right speed and number of pins. You will find they are easy to snap in and letting your machine know they are there is equally simple.

FASTER CD-ROM DRIVES

Many of today's system packages are featuring quad-speed drives. If you are still running a double-speed, do not

continued on page 95

one of the most common and effective ways to increase multimedia performance. With so

many variables available in both hardware and software, it can be daunting to make the choices that will have the most dramatic effect on your system. Let's take a look at some of the options and try and get a handle on what changes will be most productive.

RAM UPGRADES

Most systems today come loaded with

Making the Upgrade

It will be at least

REVIEW OF BLACKJACK AND CYBERSTRIP POKER

continued from page 64

Bets are kept fairly low, so it takes innumerable hands to take the dealer's money. It took nearly three hours to get the dealer to strip naked. That's a lot of poker for the payoff.

To add insult to injury, every time you close in to break the dealer's bank, she seems to have a flurry of winning hands. Unfortunately, on Mr. Jericho's station, there don't seem to be many pit bosses taking complaints.

The games are technically adequate. The smooth graphics and animation encourage users to play. As expected, the women dealers put on a nice R-rated show for your hours of effort. The soundtrack becomes wearing, so you might want to play these games with the sound off. The music could have been lifted directly off a '70s porno movie.

The adult CD-Rom market is loaded with games of skill and chance. Most of them have fairly obvious and easy functions that lead to a clearly defined goal. In this case, you're trying to get the woman on your CRT naked with your cardsharp skill.

It's not much fun to be rejected in real life by beautiful women. It's even less fun to lose your underwear to your computer. If you decide to give *Cyberstrip Blackjack* or *Poker* a spin, you'd better really enjoy playing cards.

—BUDDY SCALERA

PIXIS

continued from page 24

nies I know that does—because we have guys that are ready to crack. It's rumored that there's one individual that actually broke the bank in coverage."

As evidence of the strain, Media cites a suggestion Pixis passed up: A Plastic Man-type character whose penis stretches. "It would have crept around corners and gone into different places," he says.

As we laugh Media lunges for his pock-

et to silence a vibrating pager. "Excuse me," he says, as he leaves a bowl of shrimp and noodles to place a call he will only describe as "confidential."

"It's not that we're doing anything subversive," he explains. "It's just that this business is about ideas." Media's reputation as the most enigmatic character in adult CD-Rom is cemented when he rejects my suggestion to visit the Pixis offices for some background color.

"That would be against our policy," he says. "Since we're a technology group we shroud our movements, because we do have a lot of corporate espionage and so on. It's a big matter for us because we're working on some secret projects."

Naturally Media remains mum on those projects, although he does admit that Pixis is currently developing virtual reality software for futuristic hardware that will allow "much more" interactivity than CD-Rom.

So exactly how far away is the Orgasmatron?

"We're quite far away from having an actual virtual person become realistic," Media says. "Right now the computers can't deliver the processing power. We're bringing it closer, but there's still nothing like the real thing."

IQ

HELP COLUMN

continued from page 87

despair. There are still very few if any titles available designed to take full advantage of the quads. If you are running a single speed drive you definitely should make the move for a faster drive. In such a case, it would probably be a good idea to upgrade to a quad-speed or even a sextuple-speed if you're feeling wealthy. You don't want to have to upgrade again next year.

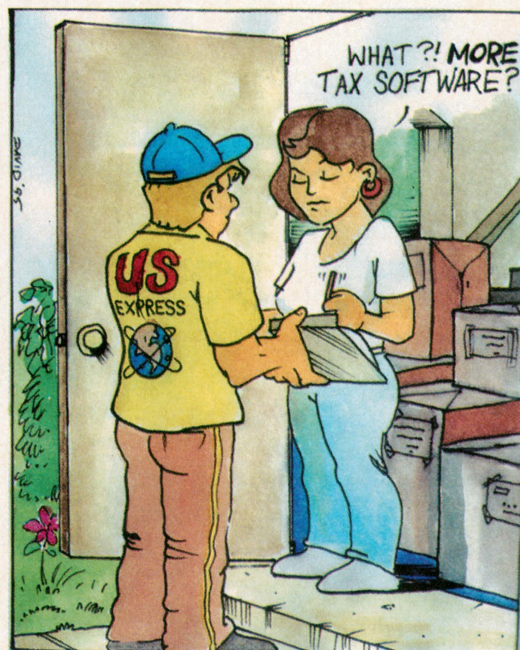

VIDEO CARDS

Multimedia software is designed to run in an 8-bit, 256 color mode. In fact, if you are running in a better mode than that, many titles will warn you to lower your system to 256 color to improve

your system performance. This is not necessarily true. Many titles look much better in thousands of colors. The audio will sometimes vary from the video in this mode, but no more than your average Kung-Fu movie. An upgrade to a 24-bit or better video card with 2 MB of memory will dramatically improve your multimedia quality, as well as your overall Windows performance. If you look to upgrade your video card, you may want to look into an MPEG card. These video-CD players will play an ever expanding library of full-screen video that has nearly television quality.

The 'average' system most publishers have in mind when they design a Multimedia title is a 486/33MHz with 8MB of RAM, a double-speed CD-ROM drive, a 8-bit 256 color SVGA video card and a 16-bit SoundBlaster compatible sound card. Upgrades to this standard will make huge improvements in your system performance. Upgrades beyond it tend to make subtle improvements, because the programming itself is limited to these standards. If you do make an upgrade, make it to the level one step beyond, because the technology is moving so fast that the 'average' might change by the time you finish reading this.

cyberotica for everyone's wires

ABOUT A YEAR AGO, I CANCELED MY SUBSCRIPTION TO *PLAYGIRL*.

Although the pictures were quite enjoyable, the articles were less than adequate. I found myself picking up my husband's *Playboy* and reading *those* articles, and tossing my *Playgirl* into the trash. I discovered that good erotica - for men or women - is difficult to find. This is also the case on the internet, but the good erotica is still out there, hiding, like the occasional article in *Playgirl* or *Playboy*. Thus begins my search on the internet for *good* erotica. Luckily, there are two wonderful usenet groups that have excellent stories on a surprisingly regular basis. Check out the **rec.arts.erotica** and **alt.sex.stories** newsgroups. **Rec.arts.erotica** is a moderated

news -

group, and **alt.sex.stories** is not. There is quite a bit of cross-posting between the two groups, so don't be surprised if you find yourself reading the same story twice.

Rec.arts.erotica has categories for every particular kink. It even says in the FAQ (Frequently Asked Questions) that "the sky's the limit." Both of these newsgroups are archived at **rtfm.mit.edu**, so you can download archives of the groups through anonymous FTP (File Transfer Protocol).

There are a few other newsgroups out there where people post stories. There's **alt.sex.exhibitionism** that has the occasional story of what someone may have done in public, and then there's **alt.sex.masturbation**, which is chock full of postings of people telling their stories on the weirdest place they've masturbated. There are also discussion groups of erotic pictures in **alt.binaries.*.d**. Every group you see in the binaries hierarchy with a **.d** ending is a discussion on the newsgroup that immediately precedes it. Sometimes there's good story material in those groups about a particularly appealing photo that's been posted to USEnet.

Remember that these articles you're reading on USEnet are written by people like you and me, and posting erotica of your own is highly encouraged. Who knows, you might even like writing it as much as accessing other people's postings.

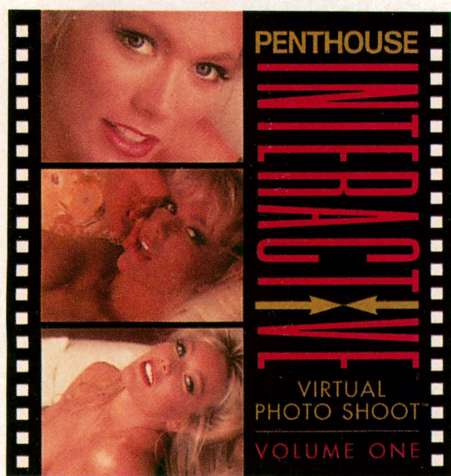

Next issue we whip through the web.

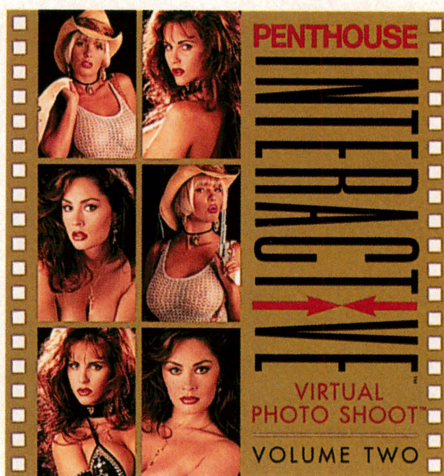

The articles are
written by people
like you and me,
and posting
erotica of your
own is highly
encouraged.

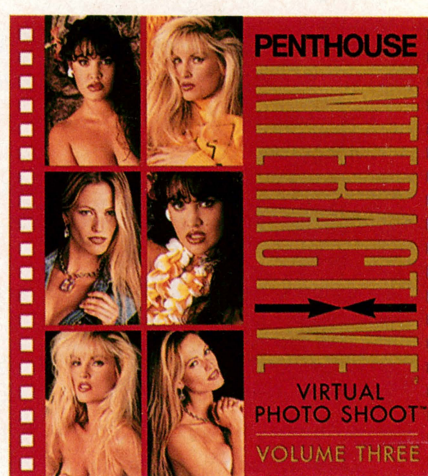

CD-ROMS FROM

Virtual Photo Shoot Vol 1: Julie, our 1993 Pet of the Year, is hotter than hot. Dominique is elegant and romantic. Natalie loves working out with men. Free 30-minute Penthouse Video I included.

PENTHOUSE

JOIN FORCES WITH THE WORLD'S MOST SOPHISTICATED INTERACTIVE HERO!

Objective:

Romance a bevy of beauties with charm, wit and sophistication. Easy for Casanova.

Problem 1:

James Spawn, a clumsy, awkward immigrant with a bad '70s wardrobe. Definitely *not* Casanova.

Problem 2-100:

A gay Austrian mountaineer, a redneck cannibal, a schizophrenic hitman, an escaped lunatic... and so on!

Result:

Hours of hilarious hi-jinx.

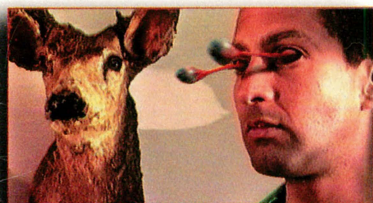

A sexy comedy with:

- 3-CD interactive cinema
- Over 100 different possible outcomes
- Full-screen, full-motion video
- Cast of over 20 professional actors, such as Rebecca Feratti (*Ace Ventura Pet Detective*), and brilliant new comedian Ted Davis in the title role
- Over two years in the making
- *Mask*-like animation and special effects
- Original stereo soundtrack
